Foreword

Through the European Economic Area (EEA) and Norway Grants, Iceland, Liechtenstein and Norway make an important contribution to strengthening economic and social cohesion and strengthening bilateral relations in the EEA. The past year has been one of delivery. From the early results coming through, we can start to see how the programmes are generating positive change.

All 150 programmes are now up and running. Over 4 000 projects have been contracted so far. In 2014, we also welcomed Croatia as the 16th partner country. This annual report provides an overview of the work underway and sets out examples of achievements in each of these 16 countries.

We also highlight results achieved in three key sectors: innovation and skills, civil society, and justice and home affairs. Our support in these areas is clearly complementary to wider EU priorities on sustainable and inclusive growth and responds to challenges which impede the full implementation of the internal market.

Innovation and skills

Many countries in Europe have struggled to adjust to the rapidly changing global economy. We need to create new growth and employment through investment in innovation, research and education. That's why significant funding is targeted at these areas. A total of 232 research institutions and 1 500 researchers have been involved in joint projects with counterparts in Iceland and Norway. Nearly 900 students, educational staff and researchers have taken part in exchanges between Iceland, Liechtenstein and Norway and a number of the partner countries.

Civil society

Over €160 million goes towards strengthening civil society in all 16 partner countries. An independent evaluation of the NGO programmes earlier this year found that, "the programmes have increased the capacity of civil society in Central and Southern Europe and helped to mobilise

citizens to voice their concerns and actively engage with governments". More than 2 300 projects have received funding so far, 718 in the area of democracy and human rights. This support is needed today more than ever to help counter negative trends across Europe, such as the rise of extremism and growing mistrust in democratic institutions.

Justice and home affairs

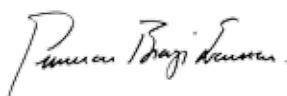

We also seek to strengthen judicial systems to help create more predictable environments for business investment, as well as improve human rights and the rule of law. Norway contributes over €140 million to improving access to and quality of justice systems, fighting cross-border crime and improving correctional services. Results so far are impressive: almost 4 400 legal professionals have received training, 4 800 people have benefitted from free legal advice and nearly 8 000 staff trained to provide better correctional services.

Effective cooperation

Achieving our goal of a stronger and more inclusive Europe requires that we meet shared challenges through efficient and effective cooperation. That's why building enduring partnerships is at the centre of our efforts. We are pleased to see the effects of bilateral cooperation in all countries. Eighty seven of our 150 programmes are carried out in cooperation with partners from the donor countries; a quarter of all projects have a donor partner, enabling mutual exchange and sharing of best practice.

Drawing on the strengths and expertise of our partners, be they individuals, government agencies or companies in the donor countries, we have been able to introduce fresh thinking and innovative solutions. Strategic partnerships with pan-European bodies like the Council of Europe and the EU Agency for Fundamental Rights have also continued to flourish.

Taking a look back, we take pride in what has been achieved in our partner countries so far. This is however just the start; many more results are still to come as implementation progresses in all countries. We hope you enjoy reading about the results of our work and cooperation.

ABOUT THIS REPORT

The EEA and Norway Grants annual report provides an overview of the aims and achievements of the funding provided by Iceland, Liechtenstein and Norway in the beneficiary countries in 2014-15.

This report highlights key results in several areas. More information on further achievements in the beneficiary countries and across sectors can be found on www.eeagrants.org • www.norwaygrants.org

Overview

Through the European Economic Area (EEA) and Norway Grants, Iceland, Liechtenstein and Norway help to reduce economic and social disparities and strengthen cooperation with 16 countries in Central and Southern Europe and the Baltics.

For the period 2009-2014, €1.8 billion has been set aside under the Grants. Funding is channelled through 150 programmes that may be implemented until 2016/17.

The EEA and Norway Grants are linked to the Agreement on the European Economic Area through which Iceland, Liechtenstein and Norway are partners with the EU. The Agreement lays down common rules required to ensure stable cooperation within the EEA. A stronger, more inclusive and more prosperous Europe requires that we meet shared challenges through efficient and effective cooperation. To secure a well-functioning internal market, the donor countries have established the EEA and Norway Grants.

Eligibility for the Grants mirrors criteria set for the EU Cohesion Fund aimed at member countries where the Gross National Income per inhabitant is less than 90% of the EU average. The EEA Grants (€993.5 million) are available in 16 European countries and financed by the three donor countries. Of this, Norway currently contributes 95.7%, Iceland 3.2% and Liechtenstein 1.1%. The Norway Grants (€804.6 million) are financed by Norway alone and earmarked for 13 countries that joined the EU after 2004.

Solidarity

The funding is targeted towards areas where there are clear needs in the beneficiary countries in line with broader European policies. Priority areas include climate change, research and innovation, civil society and investing in people through human and social development.

Cooperation

Cooperation across borders is vital to overcome the social and economic challenges Europe is facing. Partnerships between organisations in the donor and beneficiary countries are widely encouraged. Strengthening ties between organisations and institutions brings benefits for the beneficiary and donor countries alike.

Cooperation

Ensuring the bilateral dimension has been a continued focus over the past year. A large number of organisations and people are involved in partnerships aimed at strengthening political, professional, cultural, social and economic ties.

The benefits of cooperation extend both ways. Cooperation through the bilateral programmes and projects provides an arena for mutual exchange and sharing of best practice. Partnerships developed through the Grants can serve as a springboard for further collaboration or open new avenues for participation in bigger EU funding schemes.

Donor partnerships

To strengthen cooperation, more than half of the programmes involve cooperation with public bodies – known as donor programme partners (DPPs) – from Iceland, Liechtenstein and Norway.

Throughout the course of 2014, the DPPs have assisted the Programme Operators (POs) in organising launch events and facilitated partnerships through different outreach, matchmaking and information events. This has helped to bring together potential project promoters and partners from Iceland, Liechtenstein and Norway, and contributed to the development of 1 056 donor partnership projects (25%) to date.

The DPPs provide professional advice on policy issues within programmes, taking part, for example, in technical meetings or training events to support the programme strategy development, design and implementation. The close professional cooperation between the POs and DPPs has proven highly valuable for sharing views, best practice and experience on a variety of challenging issues.

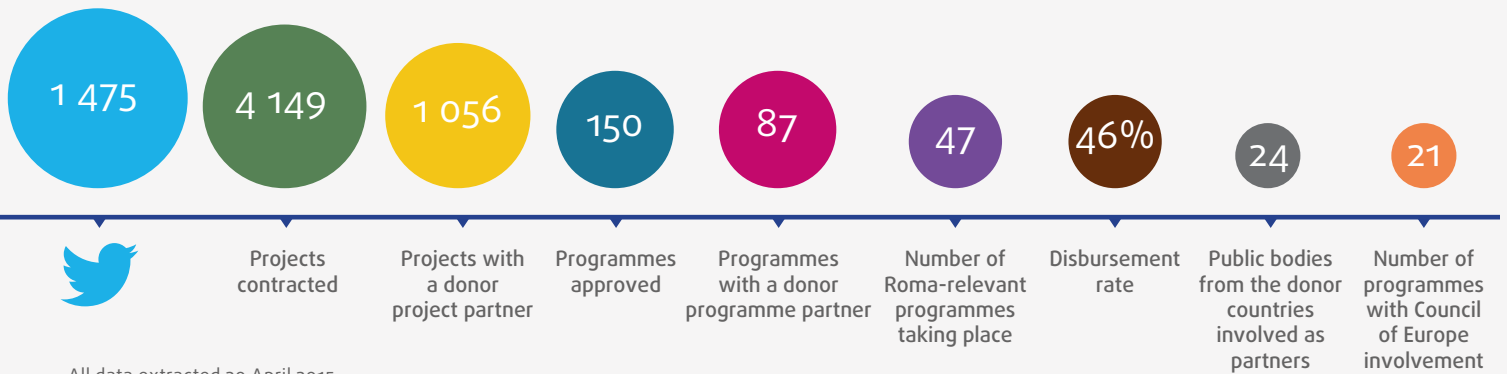

Bilateral funds

To develop cooperation activities and facilitate partnerships, funds are set aside in all beneficiary countries at national level and in each programme.

In 2014, the bilateral funds financed numerous activities including study visits, matchmaking seminars and cooperation events, and provided funding for potential partners looking to establish a partnership. This could also include cooperation in areas identified by the donor and beneficiary countries that are not covered by the individual programmes.

Partnerships with international organisations

Strategic partnerships with several international organisations are a key feature of this funding period, bringing added expertise, results and value to the grant schemes.

All data extracted 30 April 2015.

The Council of Europe provides strategic advice as well as technical input and know-how in its areas of expertise – human rights, democracy and the rule of law. In 2014, substantial progress was made on the implementation of the 21 programmes in which it is involved, spanning ten beneficiary countries, on issues as diverse as gender-based violence and trafficking, to Roma issues and justice reform. The cooperation has also included the Council of Europe youth campaign No Hate Speech Movement, to which the EEA and Norway Grants contributed as a strategic partner.

Collaboration with Transparency International (TI) – a global civil society organisation that promotes transparency and fights corruption – draws on its expertise in assessing corruption risks. Special attention is given to corruption risk associated with the grant management processes. In 2014, TI prepared country reports which point to potential risks of corruption and supported the development of an overview of risk mitigation measures to provide advice on how to tackle corruption.

The European Union Agency for Fundamental Rights (FRA) provides expert advice on the protection of fundamental rights and engages with the EEA and Norway Grants on issues of mutual interest. In 2014, cooperation with the EU Agency for Fundamental Rights centred on the themes of hate crime and hate speech, violence against women and Roma inclusion. This cooperation was useful and provided added value for both parties.

Open Society Foundations support a more open, transparent and tolerant society. In the grant schemes, they provide strategic advice on how to strengthen civil society in Europe, promote tolerance and improve the situation of the Roma. In 2014, cooperation also continued in wider platforms, such as the Roma Decade and the Coalition of International Organisations on Roma Inclusion.

SNAPSHOT OF ACTIVITIES

In a project run by the Supreme Judicial Council of Bulgaria in partnership with the Council of Europe, nine Bulgarian judges have received training in the European Court of Human Rights in Strasbourg. Specialists from the Council of Europe have played an important role in sharing their practical expertise on human rights issues. The project received **€785 000** in funding from the Norway Grants.

“This project is very important for Bulgaria. Apart from being more confident in my future work when applying the European Convention on Human Rights, it is also a great opportunity to share the knowledge obtained during this year with my colleagues when I return to Bulgaria.”

Judge Irina Ganeva, one of the judges seconded to the European Court of Human Rights

Events

March

Violence against women in Europe – our response

BRUSSELS, BELGIUM, MARCH 2014

The seminar was organised to mark the launch of the EU Fundamental Rights Agency's (FRA) survey on violence against women in Europe. Some 70 representatives from the beneficiary and donor countries took part, along with stakeholders from the other European organisations. Discussions focused on challenges presented in light of the survey findings.

"I am pleased to see that our Grants are responding to several of the recommendations put forward in the FRA report. Our efforts are relevant, timely and above all very necessary as these findings demonstrate," said Ambassador Ingrid Schulerud of the Norwegian Ministry of Foreign Affairs at the event.

April

How can EU member states combat hate crime effectively?

THESSALONIKI, GREECE, APRIL 2014

The EEA and Norway Grants were a key partner at this event organised by the EU Agency for Fundamental Rights and hosted by the Greek Presidency of the Council of the EU. Bringing together representatives from the EU, national and local authorities, law enforcement agencies, human rights institutions and civil society organisations, participants discussed best practices that could lead to improvements in recording rates of hate crime and to better reporting of such crimes across the EU.

Launch event for EEA and Norway Grants in Croatia

ZAGREB, CROATIA, APRIL 2014

In 2014, Croatia became the 16th beneficiary country of the EEA and Norway Grants. Agreements were signed by Norwegian State Secretary, Ingvild Næss Stub, and Croatian Deputy Minister for Regional Development and EU Funds, Jaksa Puljiz (both pictured).

June

Photo exhibition: Empowering young people in Europe

BRUSSELS, BELGIUM, JUNE 2014

Presented jointly by the European Commission (DG Education) and the governments of Iceland, Liechtenstein and Norway, the photo exhibition documented day-to-day life of young people in Europe today. The photos showcased how supported projects are contributing to empowering young people, in particular those most vulnerable.

September

Risk and good governance

TALLINN, ESTONIA, SEPTEMBER 2014

Organised jointly with Transparency International, the annual risk seminar focused on results and risk management in the EEA and Norway Grants. Participants also discussed key findings and main mitigating actions resulting from the corruption risk filtering exercise.

"Results-based management and effective identification and handling of risk are valuable tools for ensuring optimal results and efficient use of resources," said Norwegian State Secretary Ingvild Næss Stub, at the seminar.

November

Closing conference of the decent work and tripartite dialogue programme

OSLO, NORWAY, NOVEMBER 2014

This event provided an opportunity to summarise results of the Global Fund for Decent Work and Social Dialogue programme, exchange best practice, and look to the future. Fifty-two projects have been funded in 13 beneficiary countries, reaching 13 000 people directly and an estimated 2 million people indirectly. More than half of the projects involved cooperation of Norwegian partners.

"We have a strong tradition of cooperation between the authorities and the social partners here in Norway. Binding dialogue has contributed to securing jobs and labour standards. Norwegian partners have brought their experience to the projects," said Norwegian State Secretary, Ingvild Næss Stub, at the event.

Together against hate speech and hate crime

MADRID, SPAIN, NOVEMBER 2014

Organised by the NGO Platform for Social Action with the Royal Norwegian Embassy to Spain and the Spanish Ministry of Health, Social Services and Equality, this event brought together 200 representatives from governments, civil society, Council of Europe and the European Union Agency for Fundamental Rights. The conference served as a forum for sharing ideas and experience and for discussing practical initiatives to help prevent, raise awareness and take action on this issue.

"We must not take democracy for granted. Spreading hatred challenges our democracies. We must speak up against hate speech. If we don't, those expressing hate will win," said Ambassador Ingrid Schulerud of the Norwegian Ministry of Foreign Affairs at the event.

Development trends and challenges

Reducing disparities in Europe is one of the objectives of the EEA and Norway Grants. The consequences of the economic crisis are still holding back growth and job creation and continue to affect the economies in many of the beneficiary countries and the day-to-day life of their inhabitants, especially the most vulnerable.

This section reviews the economic and social situation in the beneficiary countries over the past year.

Economic growth

All of the beneficiary countries have a GDP per capita less than the EU average. While Romania and Bulgaria have seen their per capita income increase by around 20% since joining the EU, the average income in these countries remains substantially below the EU average.

Limited or negative economic growth over recent years has led to increased disparities throughout Europe. Having come through one of the most severe economic and financial crisis in generations, recovery is still weaker than EU forecasts projected a year ago. More positively, the EU as a whole saw a return to growth by the end of 2014, with GDP rising by 1.3% compared to 0.0% in 2013.

Nearly all of the beneficiary countries recorded higher growth than the EU-28 average as compared to the previous year, with Hungary (up 3.6% on previous year), Malta (+3.5%) and Poland (+3.4%) performing particularly well. Croatia and Cyprus registered decreases.²

1. Eurostat (2013) GDP per capita in PPS (EU28=100)

2. Eurostat (2014) Real GDP growth rate (% change on previous year)

Unemployment

Unemployment levels across the EU are slowly decreasing but still remain unacceptably high. The crisis triggered an ongoing social crisis and the slow recovery is hampering efforts to reduce the high levels of unemployment.³ The Europe 2020 – the EU's ten-year growth and jobs strategy – goal of 75% employment is still some way off.

The highest unemployment rates in the EU in 2014 were recorded in Greece (26.5%) and Spain (24.5%). Seven of the beneficiary countries registered lower unemployment rates than the EU average of 10.2%, with Malta (5.9%) and the Czech Republic (6.1%) scoring well.⁴

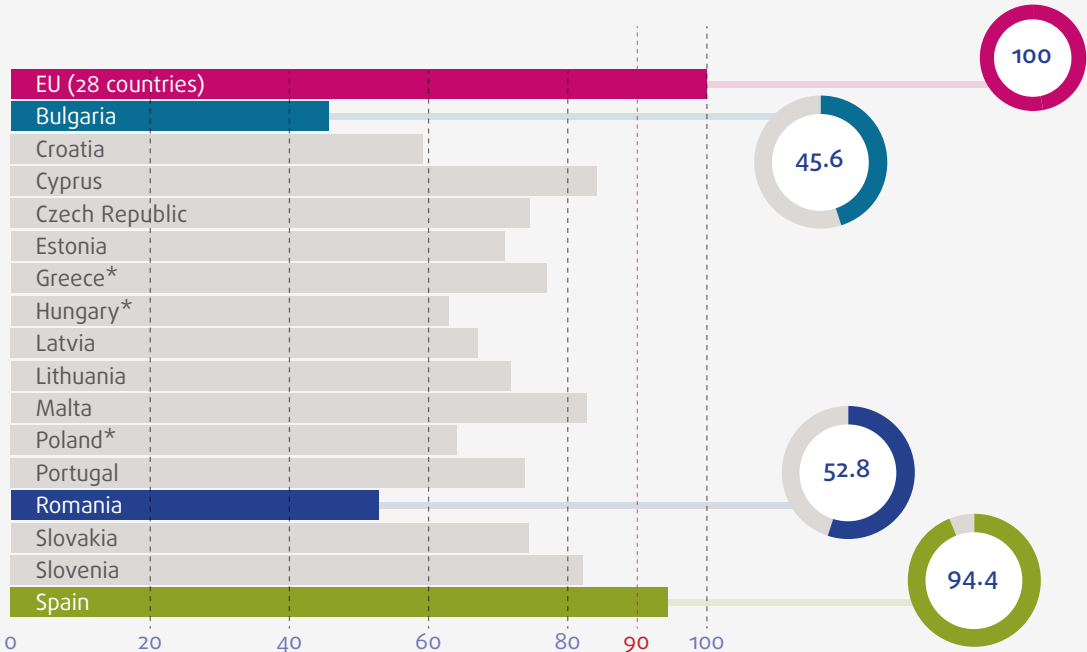

1.9 million
unemployed
young people in
the beneficiary
countries

Long-term unemployment is still rising with developments particularly negative again in Greece and Spain and to a somewhat lesser extent in Cyprus, while significant improvements have been recorded in the three Baltic States.

3. European Commission (2014) Draft Joint Employment Report

4. Eurostat (2014) Unemployment rate

Gross National Income (GNI) per capita in PPS (purchasing power standards)

Eligibility for the Grants mirrors criteria set for the EU Cohesion Fund which is aimed at EU member countries where the GNI per capita is less than 90% of the EU average. Spain is only eligible for transitional funding in this current period.

Source: Eurostat (2013 except where * indicates 2012)

While youth unemployment remains at very high levels, there are some signs of improvement. The total number of unemployed young people across the beneficiary countries slightly decreased in 2014 – down to 1.9 million by the end of 2014 from 2.2 million in the previous year (out of a total of 4.8 million young people out of work across the EU-28 as a whole). The proportion of young people under 25 not in employment, education or training (NEETs) has also remained high.

Iceland, Liechtenstein and Norway provide much needed support to research, innovation and education programmes in the beneficiary countries, to help stimulate economic growth laying foundations for future job creation.

→ Read more about these efforts in Part 2.

Half of Roma surveyed said that they have experienced **discrimination** in the past year

78% of respondents to a Council of Europe survey have encountered **hate speech online**

Sources: Eurostat, European Union Agency for Fundamental Rights and Council of Europe

Social exclusion

With low or negative growth and low employment rates the number of people at risk of poverty or social exclusion remains a concern. Over 50 million people in the beneficiary countries were at risk in 2013.¹

Some countries have seen an improvement though. The share of people at risk in 2013 compared to 2008 is lower in the Czech Republic, Poland, Romania and Slovakia. Whilst the

proportion of people at risk in Romania has decreased in the past five years, the overall figures remain high at over 40% of the population. In Bulgaria, almost half of the population in 2013 was at risk (48%).

Inequalities and discrimination

While progress has been made, wide gender gaps still prevail. The employment rate for women remains well below that of men in the EU (63.5% versus 75% in 2014)²,

1. Eurostat (2013) People at risk of poverty or social exclusion – this indicator corresponds to the sum of persons who are at risk of poverty (percentage of people whose income is below 60% of the national average) or severely materially deprived or living in households with very low work intensity)
2. Eurostat (2014) Employment rate by gender

Women account for less than
1 in 10
 members of the cabinet in
 Greece, Slovakia, Estonia,
 Cyprus and Hungary

An estimated **13 million women**
 in the EU experienced physical violence
 in the course of 12 months

3.7 million women
 had experienced sexual violence

with women overrepresented in part-time work. Almost a third of women were in part-time employment, while for men, this figure was less than 10%.

The largest disparities in the employment rate between men and women were recorded in Malta – 80.3% for men and 51.9% for women, or a difference of 29.6 percentage points (pp) and Greece (19.4 pp), with the smallest in Lithuania (2.5 pp) and Latvia (4.6 pp). It should be noted that those countries with the highest female employment rates are generally also those with a high share of employed women working part-time. One noticeable exception here is Estonia, which combines a high female employment rate and a low share of part-time employment for women.

The gender pay gap has decreased slightly at EU level in recent years; nevertheless, on average women still earn less than men in all EU countries (16% on average less per hour of work).³

When it comes to female representation in politics and business, the share of women on company boards in many of the beneficiary countries has increased with the largest percentage point rises occurring in Slovakia (+5.8 pp to 19.6%) and Hungary (+4.7 pp to 12.0%). Less positively, the proportion of women on boards has declined since 2012 in Romania (-2.8 pp to 9.1%) and Poland (-1.4 pp to 10.3%).

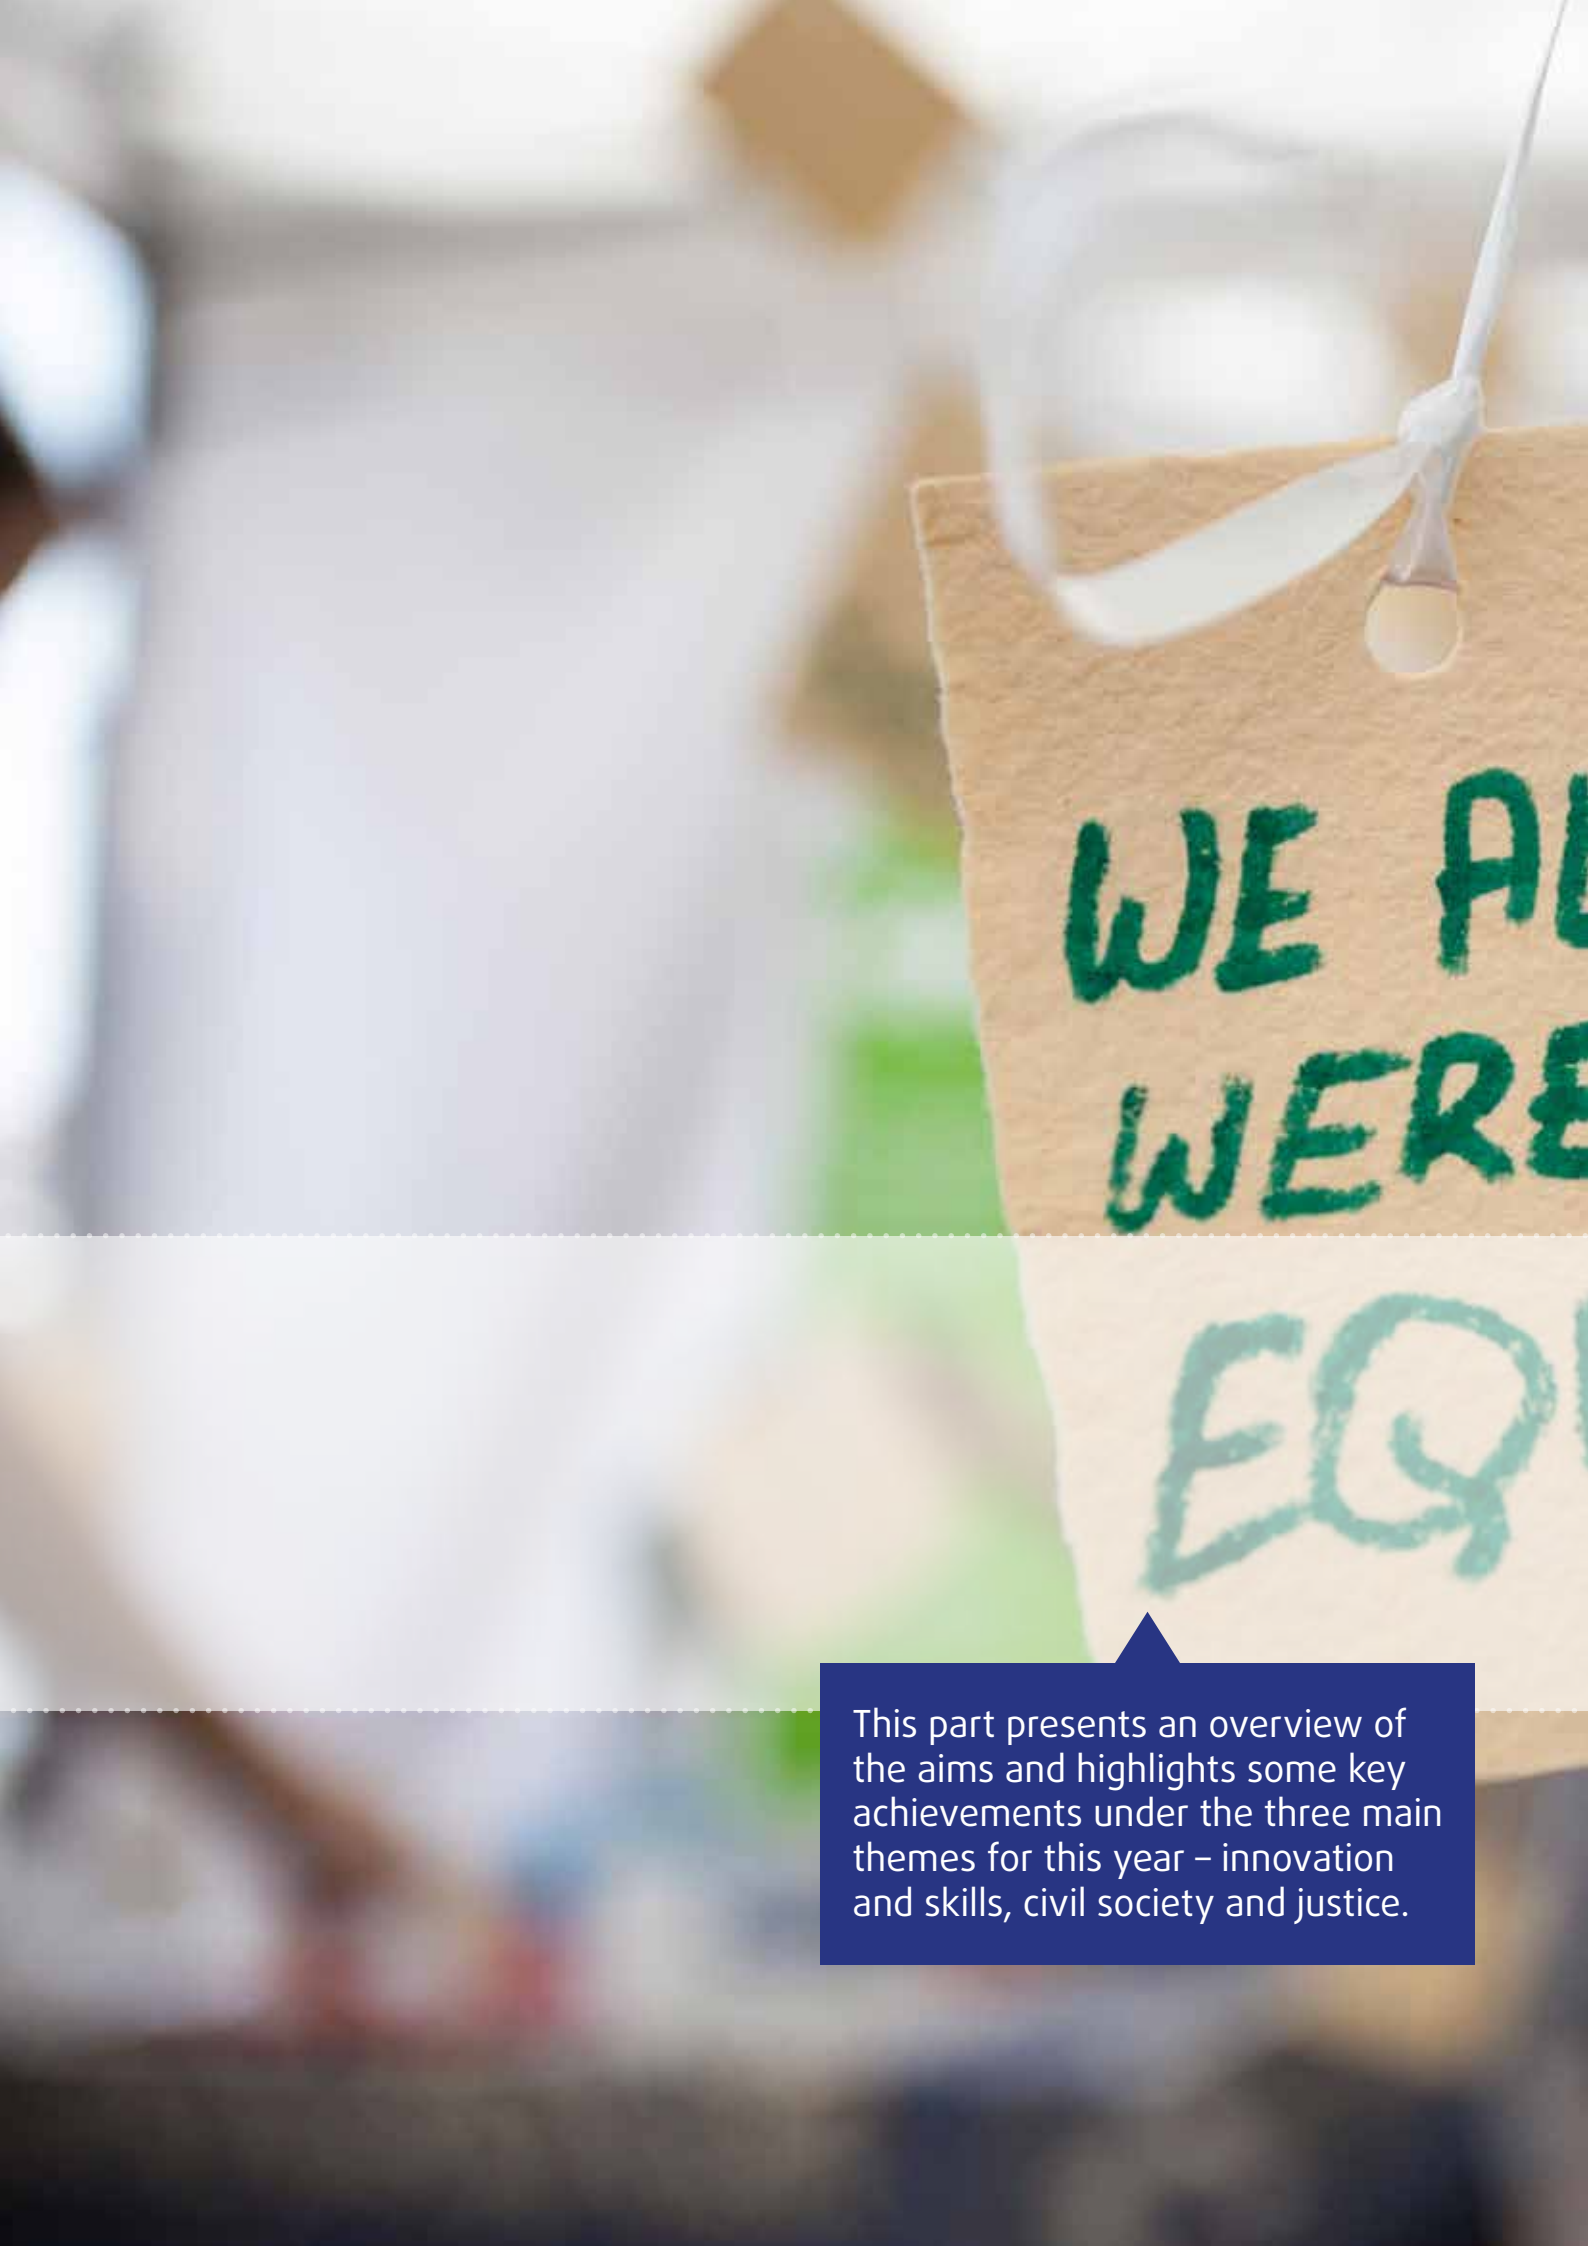

In 2013, women accounted for 27% of senior ministers in national governments across the EU. The gender balanced governments (at least 40% of each gender) of Iceland, Liechtenstein and Norway are in sharp contrast to many of the beneficiary countries; women account for less than one in ten members of the cabinet in Greece, Slovakia, Estonia, Cyprus and Hungary.⁴

One of the most serious violations of gender equality is violence against women. According to the findings in a survey published in 2014 by the EU Agency for Fundamental Rights (FRA), an estimated 13 million women in the EU experienced physical violence in the course of the 12 months prior to the survey, while some 3.7 million women had experienced sexual violence.

A number of other reports from FRA and other international organisations like the Council of Europe have also documented worrying levels of harassment and violence directed towards vulnerable groups - immigrants, Roma communities and other minorities. The donor countries support numerous initiatives through the EEA and Norway Grants to strengthen fundamental rights, counter discrimination and tackle gender-based violence, hate crime and hate speech.

4. European Commission (2013) Women and men in leadership positions in the European Union

WE ALL
WERE

EQ

This part presents an overview of the aims and highlights some key achievements under the three main themes for this year – innovation and skills, civil society and justice.

THEMATIC SECTION

Innovation and skills

Investment in education, research and innovation is a key driver of growth and job creation and is crucial to improve Europe's global competitiveness. Significant funding from Iceland, Liechtenstein and Norway is targeted at these areas.

The programmes contribute to increasing research capacity and cooperation, promoting educational cooperation, greening of industry and development of green technologies. The cultural programmes offer potential for local job creation and skills development.

What's the issue?

Investing in science, research and technology is crucial to help European companies innovate and stay competitive, create jobs and secure economic and social welfare. Moreover, education and training are essential to the development of today's knowledge society and economic growth. Investment however, is lagging behind and several beneficiary countries have made cuts in public education and research budgets due to the economic crisis. To achieve sustainable economic growth, investment in new green technologies and green innovation is important, but there is still a general lack of available funding to support eco-innovation.

With unemployment rates in Europe remaining high, especially among young people, it is crucial to better match people's skills with the needs of the labour market. Boosting possibilities for international exchange help students acquire new skills and strengthen their employment opportunities.

What are we doing?

Almost **one fifth** of the funding under the EEA and Norway Grants is going to growth enhancing programmes.

In addition, Iceland, Liechtenstein and Norway support other areas that contribute to skills development, including:

- Revitalisation of cultural heritage and stimulation of cultural cooperation
- Capacity building and training under the NGO programmes
- Early childhood education and preventing youth from dropping out of school

Meet a partner

Innovation Norway is the Government’s most important instrument for innovation and development of Norwegian enterprise and industry. Innovation Norway is involved in all eight green innovation programmes as well as in the environmental and climate change research and development programme in Spain. We asked programme manager Anne Lise Rognlidalen about her experience.

What are the main challenges for small and medium sized enterprises in the beneficiary countries?

We see a lack of new technology and modern resource efficient equipment, resulting in low productivity. Furthermore, there is little financing and knowledge for innovative green projects. The shortage of access to long term financing for investment projects is also a challenge.

What is the added value for Norwegian enterprises getting involved?

The participation gives direct access to business opportunities and business culture in the beneficiary

countries. The trigger is to gain access to new market knowledge and to build networks. It however, has to be based on a defined need for the Norwegian enterprises’ own business development. We are searching for a long term win-win situation for both parties.

When a Norwegian company wants to explore new market opportunities, they usually need to find a partner in the respective market. This is time-consuming and represents a risk. The green industry innovation programme can therefore be seen as a strategic tool for risk reduction.

KEY RESULTS 2014-15

#1 ACHIEVEMENT:

Increasing research capacity through cooperation

- ➔ More than **1 500** researchers involved in joint projects
- ➔ **328** PhD and postdoctoral students supported
- ➔ **29** female professors, post-doctorals and PhD-students in technical sciences in Poland funded to strengthen their career development

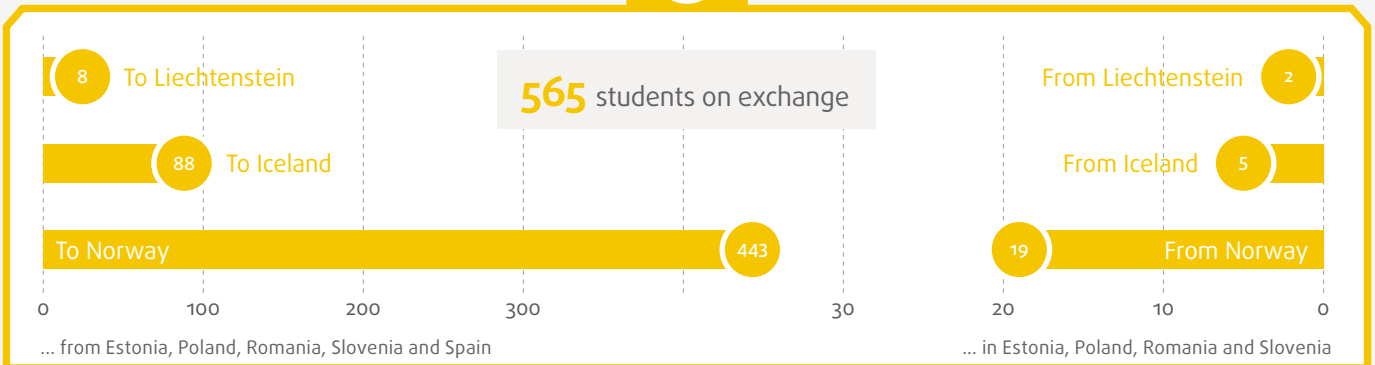

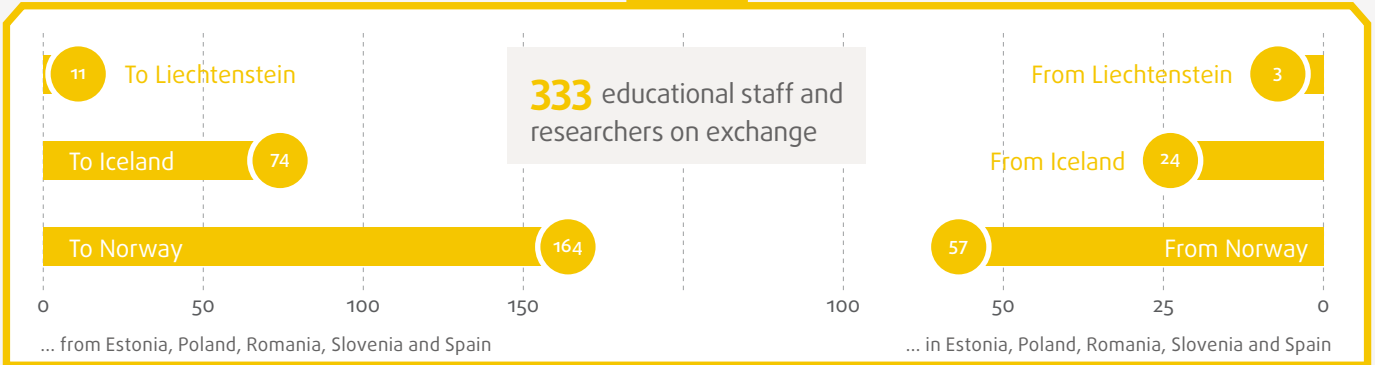

#3 ACHIEVEMENT:

Developing green business

- ➔ **158** green innovation projects to date. **69** of them with a partner from Norway
- ➔ **169** company-driven, innovative research and development projects boosting green technology in Spain. **27%** of them in partnership with companies from Norway and Iceland
- ➔ Transfer of knowledge from universities and research centres to companies through **147** contracts with research institutions

#2 ACHIEVEMENT:
Increasing educational cooperation and exchange

Working in cooperation: snapshots

Poland

Climate change is having a dramatic impact on potato crops. A Polish-Norwegian research partnership is seeking to assess the effects of global warming. Bioforsk PlanteHelse from Norway, the Plant Breeding and Acclimatization Institute in Młochów and the Intercollegiate Faculty of Biotechnology of the University of Gdańsk and the Medical University in Poland have teamed up to look at the most common potato diseases.

Project promoter: Plant Breeding and Acclimatization Institute - National Research Institute

Grant amount: €790 500

Project link: bit.ly/1lQna8

Norway

Slovakia

Current district heating systems in Slovakia consist of old, environmentally unfriendly technologies and heat production depends on externally supplied natural gas. The energy production does not promote the local economy and use of local renewable resources. Through cooperation with three Norwegian partners (International Development Norway AS, Norskog and the Norwegian Forest and Landscape Institute) central heating plants based on biomass have been established in three towns. This will contribute to local job creation and a stable energy supply.

Project promoter: Intech Slovakia

Grant amount: €4.2 million

Project link: bit.ly/1ET579p

Portugal

Through the 'Cultural Rucksack' all pupils in Norwegian schools get to enjoy all kinds of professional art and cultural experiences. This concept is now adopted in Portugal and has been adapted to local needs. Portuguese children have access to high quality cultural education to promote social inclusion.

Link to projects: bit.ly/1k6bH3

Portugal

Spain

Liechtenstein

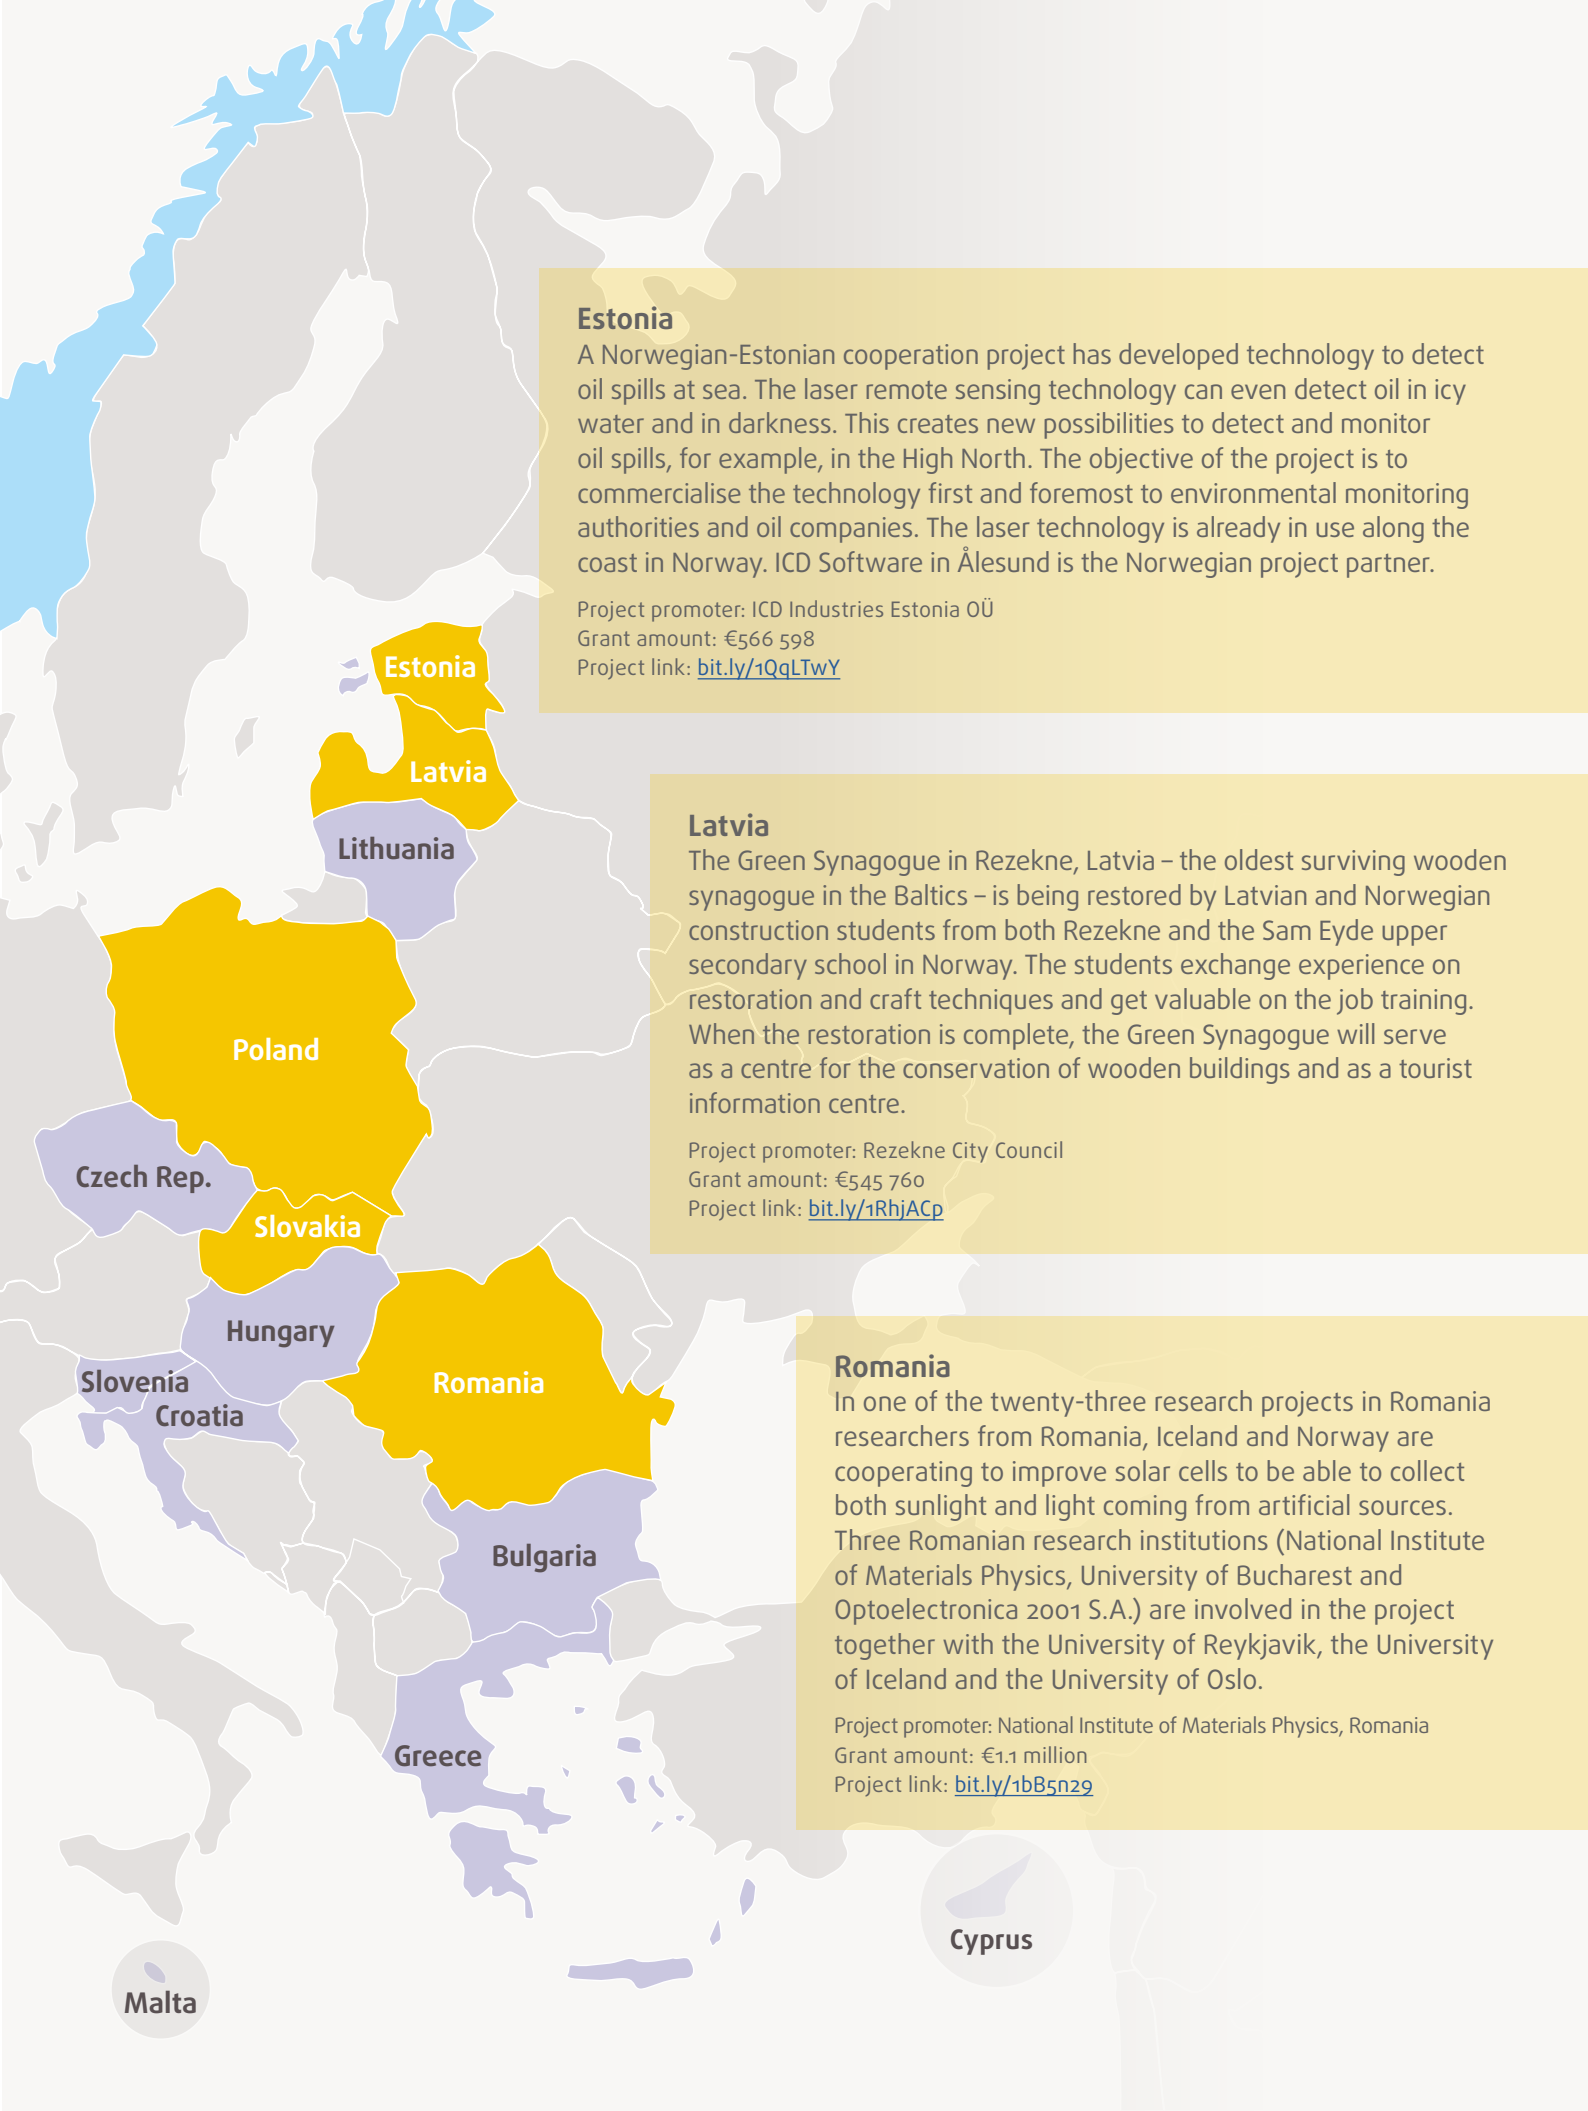

Spain

Spain's number one energy group, Iberdrola, is cooperating with the leading research organisations SINTEF (Norway) and Tecnalia (Spain) looking at the connection of power generated by solar plants to the energy grid. For Iberdrola the cooperation project represents a springboard for future collaboration – opening both new channels of communication and new markets.

Project promoter: Iberdrola

Grant amount: €182 834

Project link: bit.ly/1KHqYfy

Estonia

A Norwegian-Estonian cooperation project has developed technology to detect oil spills at sea. The laser remote sensing technology can even detect oil in icy water and in darkness. This creates new possibilities to detect and monitor oil spills, for example, in the High North. The objective of the project is to commercialise the technology first and foremost to environmental monitoring authorities and oil companies. The laser technology is already in use along the coast in Norway. ICD Software in Ålesund is the Norwegian project partner.

Project promoter: ICD Industries Estonia OÜ

Grant amount: €566 598

Project link: bit.ly/1QqLTwY

Latvia

The Green Synagogue in Rezekne, Latvia – the oldest surviving wooden synagogue in the Baltics – is being restored by Latvian and Norwegian construction students from both Rezekne and the Sam Eyde upper secondary school in Norway. The students exchange experience on restoration and craft techniques and get valuable on the job training. When the restoration is complete, the Green Synagogue will serve as a centre for the conservation of wooden buildings and as a tourist information centre.

Project promoter: Rezekne City Council

Grant amount: €545 760

Project link: bit.ly/1RhjACp

Romania

In one of the twenty-three research projects in Romania researchers from Romania, Iceland and Norway are cooperating to improve solar cells to be able to collect both sunlight and light coming from artificial sources. Three Romanian research institutions (National Institute of Materials Physics, University of Bucharest and Optoelectronica 2001 S.A.) are involved in the project together with the University of Reykjavik, the University of Iceland and the University of Oslo.

Project promoter: National Institute of Materials Physics, Romania

Grant amount: €1.1 million

Studying the brain from different perspectives

An Estonian-Norwegian research project examines the different molecules which play an important role in the functioning of the brain. Ultimately, the research can help to find more effective treatments of different psychological disorders.

Project promoter: Tallinn University of Technology

Grant amount: €269 999

Project link: bit.ly/1JwDuaR

"We have a very useful cooperation with the University of Bergen. They are really good at in vivo experiments (in the living body of a plant or animal), while this is something we don't have knowledge about here. We draw on each other's different areas of expertise to the benefit of the research project and both parties."

Hanna Vihma, PhD student at Tallinn University of Technology

Collecting waste for recycling

Romania has the lowest recycling rates in the EU. Constantin Cristea with his company Total Waste Management SRL, is creating a network of 25 collection points for different types of waste across the country.

Green Business Norway – an organisation with much experience in organising public awareness campaigns on environmental issues – is a partner in the project. The new collection points integrate Norwegian technology into the concept supplied by Tomra Systems AS and Orwak Norway AS.

Project promoter: Total Waste Management SRL

Grant amount: €1.4 million

Project link: bit.ly/1H39xez

"Each collection point generates 2-5 jobs. So far we have created at least 50 new green jobs under this project. By the end of November 2015, this project will generate 120 new jobs. This might not have a huge impact on employment, but it is still important as we employ mostly from those cities in Romania where people often have problems finding a job."

Constantin Cristea, Total Waste Management

“Cooperation in the research programmes contributes to building research networks enabling further cooperation between researchers from Norway and the beneficiary countries.”

Aleksandra Witczak Haugstad, Research Council of Norway, Donor Programme Partner in six countries

“The Icelandic students who came to Warsaw for the workshop on working with wheelchair users had previous experience and knowledge in adapted physical activity which we did not yet have. The workshop opened my eyes to this field focusing on improving the quality of life for persons with special needs.”

Łukasz Kozłowski, student of physiotherapy at Józef Piłsudski University of Physical Education in Warsaw, Poland

“It is very important to give youth a chance to study abroad for a while to learn about other cultures, people and school systems. Participants in the scholarship programmes from Liechtenstein are enthusiastic about working with partners from other countries.”

Marion Kindle-Kühnis, the Agency for International Education Affairs (Liechtenstein), Donor Programme Partner in scholarship programmes in nine beneficiary countries

“Learning through the scholarship programmes goes both ways. Through cooperation, the Icelandic participants are confronted with challenges, ideas and solutions in the school systems in other countries which they can then bring home.”

Vidar Helgason, the Icelandic Centre for Research, Donor Programme Partner in scholarship programmes in nine countries and in the research programme in Romania

Civil society

Iceland, Liechtenstein and Norway contribute more than €160 million to strengthen civil society through NGO programmes established in the 16 beneficiary countries. The programmes increase the capacity of civil society in Central and Southern Europe and the Baltics and help mobilise citizens to voice their concerns and actively engage in social development.

What's the issue?

Civil society is a fundamental building block of democratic governance and social cohesion. Non-governmental organisations (NGOs) play a vital role in promoting democratic values, human rights and fostering civic participation. They help to raise awareness about social and environmental issues, bring citizens' concerns to governments and tackle key concerns in society, both as advocates and service providers.

The aim of the NGO programmes is to achieve a stronger and more developed civil society able to empower marginalised groups in society and contribute to democratic development.

The support from the donor countries plays a critical role in building the capacity of the sector itself through organisational support, peer exchanges, training and mentoring, as well as underpinning advocacy work on anti-corruption and transparency, anti-discrimination and human rights.

What are we doing?

€160 million

83% of funding supports:

- democracy and human rights
- social inclusion and vulnerable groups
- anti-discrimination and equality

17% of funding supports:

- welfare services for marginalised groups like Roma

Demand has been high

- **8 times** more applications than available funds. Oversubscription particularly high in Greece and Slovenia
- Over **21 000 applications** received
- Almost **2 300 projects** funded so far

Evaluation of NGO programmes

The NGO programmes have increased the capacity of civil society in Central and Southern Europe and helped to mobilise citizens to voice their concerns and actively engage with governments. This was the key finding in the independent evaluation of the NGO programmes presented in February 2015. The report also confirmed that the programmes are generally well-managed and effectively and efficiently run, demonstrating "an innovative and effective approach to management of public funds, outsourced to organisations independent of governments".

The report contains many more findings, lessons learned and recommendations that will be both followed up and used to inform future programmes. Read more in the full report here: bit.ly/1Ku3uQO

Bilateral cooperation

The NGO programmes have generated a high number of partnerships between civil society organisations in the beneficiary and donor country organisations. So far **268 projects involve a partner from one of the donor countries**. These partnerships facilitate innovative types of exchange and peer-to-peer learning, sharing of data, methodologies and best practice around topics of relevance to the programmes. Romania, Poland, Bulgaria and Latvia have the highest number of bilateral partnerships to date.

SNAPSHOT: PROMOTING PEER-TO-PEER LEARNING

In Hungary, the programme supported 11 internships for NGO professionals to spend 3-6 months at a host organisation in Norway or Iceland to learn about best practices on issues as diverse as homelessness, volunteering, human rights, and social entrepreneurship.

The same programme also organised the 'On the Spot' scheme which enabled a number of young people to visit one of the three donor countries and report online on best practice in addressing social problems which could benefit Hungarian society. Those selected each received a grant to help with travel and subsistence costs.

Overview of NGO programmes (€ million)

Tackling hate speech, hate crime and discrimination is a priority for the NGO programmes. More than 500 projects focus on these areas.

The EEA and Norway Grants are a strategic partner to the Council of Europe's No Hate Speech campaign. By raising awareness of hate speech online and mobilising action against online extremism, the campaign aims to promote internet literacy and support young people in standing up for human rights. All of the NGO programmes have made a strong contribution to the campaign which was launched in March 2013 and runs until the end of 2015.

Activities have included developing training toolkits for schools, mobilising youth activists against cyber-bullying and training for bloggers. In total, 352 youth bloggers have received training in how to identify, report on and address hate speech online.

KEY RESULTS 2014-15

#1 ACHIEVEMENT: Working on human rights

718
projects
to date

Support for
178 NGOs
working on human
rights and
anti-discrimination

#2 ACHIEVEMENT: Building NGO sustainability and capacity

125
projects
to date

Almost **300 NGOs**
reporting strengthened
capacity

Over **40 NGOs** have
achieved new sources of
funding helping ensure
future sustainability

#3 ACHIEVEMENT:
Strengthening advocacy and watchdog activities

163
projects
to date

- **142 NGO coalitions** or networks developed
- Support for **24 NGOs** involved in policy and decision-making processes
- **47 laws or policies** changed or improved because of NGO action

#4 ACHIEVEMENT:
Empowering vulnerable groups and improving social protection

265
projects
to date

- **44 000** women, children, Roma and victims of trafficking report better welfare protection
- **137 NGOs** working with vulnerable groups supported

Voices and faces

Promoting transparency in governance

A law aimed at protecting whistleblowers in Lithuania was proposed in 2010, but has been stalled in Parliament ever since. Transparency International (TI) Lithuania teamed up with its sister organisation in Norway to promote accountability and openness in public institutions. Drawing on an anti-corruption handbook and training for municipalities developed by TI Norway, the Lithuanian branch is now actively contributing to the preparation of legislative proposals and working groups on institutional openness.

Project promoter: Transparency International Lithuania
Grant amount: €118 978
Project link: bit.ly/1Fnxyym

Giving Roma women a voice

Roma women in Slovakia have benefitted from training on local politics to help them play a more effective role in their communities. Working with 12 women from six localities and two regions in western and eastern Slovakia, the project used a tried-and-tested method promoting civic participation through local action groups. The project has given the women the confidence to meet and influence decision-makers, both at home and beyond, with five travelling to Brussels to meet Slovak MEPs.

Project promoter: In Minorita (In Minority)
Grant amount: €56 489
Project link: bit.ly/1L6Ye4W

“There needs to be someone to advocate for those who are socially disadvantaged. They need a voice. I have always been visible in the community but now I have the confidence to speak out and speak up.”

Dana Bandryová, volunteer,
In Minorita

Protecting victims of hate crime

Despite a rise in violent racially motivated attacks, major weaknesses persist in the Greek system for protecting victims of hate crime. The Hellenic League for Human Rights is strengthening its capacity to address the legal and procedural gaps, improve reporting of hate crimes and increase provision of welfare and legal services for victims.

Project promoter: Hellenic League for Human Rights
Grant amount: €198 000
Project link: bit.ly/1LxwXus

My home without violence

Polish NGO, Monar, has strengthened its capacity and improved its own staff training to better support victims of domestic violence. Monar works with victims, in particular single mothers with children living in their shelters, with day-to-day tasks like applying for social housing and ensure that their children are taken care of. It also provides therapy and counselling to help the women integrate back into society.

Project promoter: MONAR Association
Grant amount: €48 888
Project link: bit.ly/1j9lVK8

“Our project is carried out in the three Polish cities of Gdansk, Turow and Zgorzelec. In each of these cities we run hostels for women who are victims of domestic violence. Many of these women have become homeless as a result of their abusive relationships.”

Iwona Pasichnyk, project manager, MONAR

Advocating for LGBT rights

More than half of the Lithuanian LGBT (lesbian, gay, bisexual, and transgender) community feel discriminated against. The Lithuanian Gay League is working to mainstream LGBT equality in the decision-making process through awareness-raising activities amongst the general public and policymakers.

Project promoter: Lithuanian Gay League

Grant amount: €111 940

Project link: bit.ly/1zKAXPt

"All of these girls are severely traumatised. They are extremely vulnerable, and often have little trust in the system. We take care of everything in the interim period while they're getting back on their feet."

Jade Holtham, facility manager,
Cyprus Stop Trafficking

Supporting Cyprus to stop trafficking

Cyprus is a destination country where prostitution and human trafficking is thriving. Cyprus Stop Trafficking (CST) cooperates and works alongside other NGOs, the police, social services and other government agencies to provide support to trafficking victims. Through the project, CST has expanded its activities and increased its welfare provision for victims.

Project promoter: Cyprus Stop Trafficking

Grant amount: €101 339

Project link: bit.ly/1KtS7cb

Help for the homeless

From sleeping rough, Milan (pictured) now has a job in DOME C homeless centre's coffee shop in Bratislava, run by the NGO, Vagus. Vagus has been able to finish construction of the centre and increase service provision. The achievements are impressive: 3 100 people have received specialist consultations; 280 are involved in leisure activities; 100 in regular work activities; and 12 have successfully completed the full integration process. The Salvation Army Norway were actively involved as a partner.

Project promoter: OZ Vagus

Grant amount: €79 853

Project link: bit.ly/1FVUcOg

Empowering citizens through technology

Public consultations on draft laws have been available in Greece since 2010. Yet, participation is low and the numbers keep dropping. With the DemocraIT project, the NGO, SciFY has developed a more user-friendly online system to facilitate citizen participation in public consultations. The state-of-the-art web-based solution will present results in an accessible and structured format, enabling decision-makers to take account of a broader range of opinion. The system can be adapted to work with any language and any political system.

Project promoter: SciFY

Grant amount: €55 505

Project link: bit.ly/1Dm2cHL

Justice and home affairs

Norway contributes more than €140 million to strengthening judicial systems, fighting cross-border crime and to improving correctional services in 11 beneficiary countries. An independent, transparent and efficient justice system is a crucial condition for the proper functioning of the internal market. Businesses want to invest in countries where the judiciary can enforce their rights and do so in a timely way.

What's the issue?

Judicial capacity building

A fair and effective justice system is important for reducing disparities.¹ Businesses are more confident about investing in a country if its judicial decisions are made in a predictable, timely and enforceable way. Justice reforms that increase efficiency have been shown to have a positive impact on entrepreneurial activity and foreign direct investment.

The World Bank Group carries out an annual assessment on the ease of doing business. The rankings place particular importance on the ability of companies to enforce contracts.

Ease of Doing Business (global rank)²

Cross-border crime

Norway is a part of the Schengen agreement that facilitates the free movement of people across Europe. Open borders bring many advantages, but they also require extra vigilance in fighting cross-border crime, such as human trafficking and money laundering.

Correctional services

Norway works with some of the countries with the highest prison populations in the EU. The Council of Europe has highlighted 'chronic prison overcrowding' and the resulting poor conditions as a major issue of concern. Norway is also putting a strong focus on the rehabilitation of prisoners to help ensure that, once out of prison, they no longer become involved in criminal activity.

Prison population rates per 100 000 inhabitants³

¹ DG Economic and Financial Affairs, European Commission

² World Bank Group (2014)

³ International Centre for Prison Studies (2014)

What are we doing?

The projects funded in this area are mostly pre-defined; this means that the projects address shortcomings already identified, usually by independent international organisations or national governments. They are also in fields that are usually restricted to state organisations, such as correctional services, the police service, and the court system.

SNAPSHOT: IMPROVING PRISON CONDITIONS

In Poland, the Directorate of Norwegian Correctional Services is working in partnership with the Polish Central Board of Correctional Services to improve the competencies of prisoners and prison staff.

This ensures that staff are better qualified to carry out their duties and that prisoners obtain skills for life after prison. Prisons have been adapted to make them more child friendly, helping prisoners maintain family bonds during their sentence. Prisoners are also given skills to help them deal with negative emotions that were often the root cause of the original offence.

Project promoter: Polish Central Board of Correctional Services
 Grant amount: €2.1 million
 Project link: bit.ly/1FiUeLS

Prisoners are helped in dealing with negative emotions through counselling and dog therapy

Overview of justice programmes

Judicial capacity building and cooperation (€ million)

Correctional services, including alternatives to prison (€ million)

Schengen and combatting cross-border crime (€ million)

KEY RESULTS 2014-15

#1 ACHIEVEMENT:

Strengthening judicial capacity building and cooperation

- **572** judges and other legal professionals trained on the provisions of the European Convention of Human Rights and its case law
- **4 368** legal professionals trained to ensure a faster and more efficient judicial system
- **4 781** people have received free legal advice

#2 ACHIEVEMENT:

Improving correctional services

- Nearly **8 000** prison staff trained to provide improved correctional services
- **326** people are following alternatives to prison
- **260** women receiving health care while in prison

#3 ACHIEVEMENT:

Fighting cross-border crime

- Bulgarian authorities have worked with Norwegian counterparts in a project to learn about Norwegian best practice in the use of Schengen information and sharing tools
- Cyprus authorities established a new IT system and received training from Norwegian experts on how to combat money laundering

Voices and faces: meet the partners

Norwegian organisations and the Council of Europe play a vital role as donor programme partners, they advise and assist beneficiaries on how to meet international standards, bring expertise and provide exchange programmes.

The Directorate of Norwegian Correctional Service (KDI) is a donor programme partner in Romania, Lithuania, Latvia and Poland. In addition, the Directorate cooperates with the Czech Republic and Bulgaria, where the Council of Europe acts as the lead programme partner. We asked the Director of KDI, Kim Ekhaugen, about the exchange of best practice.

In your experience, how easy is it to transfer the Norwegian practice to beneficiary countries?

The transfer of best practice from Norway has been welcomed in the beneficiary countries and 14 partnership projects are being implemented. I would like to emphasise that I see a lot of enthusiasm for change. People are really interested in creating a better future for inmates and staff.

What are the specific challenges that the beneficiary countries face?

Many face serious problems in particular with regard to overcrowding.

Is there a particular project where your involvement has made a real difference?

In Latvia, they are building their first prison unit for addicted inmates. As in most countries, a high percentage of inmates in Latvia are addicted to drugs or alcohol and this is a big problem in prisons. In Lithuania, they are in the process of opening four halfway houses, which will give some of the inmates a completely new way of serving their sentence. By living in a halfway house, they will have to learn basic life-skills and hopefully leave prison for crime-free futures.

The Council of Europe (CoE) is a donor programme partner in five programmes in the fields of judicial capacity building and correctional services. We spoke to Head of the Council's Justice Capacity Building Unit, Natalia Voutova, about their cooperation.

How does the Council of Europe's involvement contribute to this area?

The CoE brings over 25 years of experience in managing joint projects; we know how to make sure projects are viable, efficient and results-oriented. Norway Grants are vitally important in helping countries meet international standards and tackle weaknesses in their judicial systems.

What are the specific challenges that the beneficiary countries face?

This depends on the country as there is an ongoing process of reform in many of the countries. The challenge is to capture and understand what the issues are. Through working with these countries over the last 20 years, we know how to tailor projects to the countries' needs.

Do you think the funding will make a lasting difference?

From the very outset, we have thought about the sustainability of our work, this is one of the 'golden rules' for us, we don't want a short term win, we want to make a long term difference. Norway's funding in this area is starting to make a real difference. Our most advanced projects, in terms of implementation, are in Bulgaria. We have definitely achieved results; the Roma minority has much better access to justice.

The Norwegian Courts Administration (NCA) is a donor programme partner in programmes for judicial capacity building and cooperation in Lithuania, Poland and Romania. We asked Head of International Secretariat, Audun Hognes Berg, about the NCA's cooperation.

In your experience, how easy is it to transfer the Norwegian practice to beneficiary countries?

We have to be cautious when assessing which solutions or practices to propose. Factors like societal and judicial culture must be considered when selecting best practice.

What are the specific challenges that the beneficiary countries face?

Most countries are struggling to combat backlogs and excessive case-processing times, especially with reduced budgets. This is a challenging environment for reforms.

What do you think is the main strength of Norwegian practice?

The Norwegian judicial system is one of the best-functioning in Europe. This relates, among other things, to the timeliness of our decisions. We are also one of the 'cheapest' judiciaries in terms of costs.

Do you think the funding will make a lasting difference to improving the judicial system?

It is hard to predict the long term effects but I am confident that the funding and exchange of experience will improve the judicial systems of beneficiary countries.

By way of example, in Romania we have been involved in a project concerning access to justice. A study was carried out to identify barriers faced by the Roma and other vulnerable groups. Romania will now create a number of centres to help the Roma population and other vulnerable groups in seeking legal advice. These could make a real difference.

The Norwegian National Police Directorate (POD) is involved as a donor programme partner in four programmes in Bulgaria, Lithuania and Romania. Two of these are under the programme area concerning Schengen and Cross-Border Crime. We asked Assistant Chief of Police in the International Section, Eva Lynghjem, about her involvement.

How has POD benefitted from its involvement in this programme area?

It is of great value to be able to learn from each other's experience in order to fight organised and cross-border crime. The programmes allow us to focus on the wider picture and not just those that emerge on a case-by-case basis through regular criminal investigations, or through organisations such as Interpol and Europol. Bilateral cooperation is necessary to fight cross-border and organised crime.

Have you learned anything from the experience that you've found useful in Norway?

Different units in our Police Service have had the chance to cooperate with similar units in the beneficiary countries in order to learn more about their police system. This gives us a better understanding of crime that is committed in Norway.

Is there a particular project where your involvement has made a real difference?

Norwegian and Bulgarian police have a joint project, sharing best practice in the use of different Schengen information cooperation tools, such as SIRENE. Norway has been using these tools since 2001 and has a great deal of experience in their use. We are sharing this expertise with our Bulgarian counterparts.

This part provides an overview of the main priorities and key achievements of the EEA and Norway Grants in each of the beneficiary countries over the past year.

Key results 2014-15

#1 ACHIEVEMENT Strengthening the justice system

4 781

individuals from vulnerable groups, including Roma, received free legal assistance

572

judges and other legal professionals trained on human rights

260

women in prison receiving better medical services

532

professional trained on use of alternatives to prison

326

persons given alternatives to passing sentence in prison, including electronic monitoring

#3 ACHIEVEMENT Strengthening civil society

114

NGOs promoting democratic values and human rights

26

NGO coalitions or networks developed

24%

of the funding so far to projects focusing on Roma inclusion

18

of the projects to date have partners from Norway and Iceland

#2 ACHIEVEMENT Supporting social inclusion and education

53

Roma school mediators and youth leaders trained

179

pre-school staff trained in teaching Roma children and children from deprived families

4

youth centres established in areas with a high Roma population

Cooperation with the Council of Europe

The Council of Europe is involved as a strategic programme partner in **five** programmes and as a project partner in **eleven** projects.

“Through this innovative work with children aged 3-6 years from underprivileged families – including Roma – in Bulgaria, the Council of Europe and its partners are achieving tangible results in building a more inclusive society. Our hope is to scale up and replicate this promising and successful programme.”

Jean-Christophe Bas, Director of Democratic Citizenship and Participation at the Council of Europe.

Snapshot of projects

Empowering Roma youth

A youth centre for young people aged between 15 and 29 years is being established in the southern Bulgarian city of Plovdiv which has a large Roma population. The centre serves as a drop-in meeting place and offers both recreational activities as well as vocational skills training opportunities.

The Norwegian research institute Agderforskning is cooperating with Plovdiv municipality in developing and establishing the youth centre.

Project promoter: Municipality of Plovdiv

Grant amount: €828 714

Project link: bit.ly/1D7Xc44

“For us as Roma it can be difficult to meet people from outside our own community. So I hope that the youth centre can be a place where young people from Plovdiv can meet regardless of ethnic background.”

Svetoslav Aleksiev (pictured centre)

Improving milk quality and the environment

By introducing renewable energy sources such as solar collectors to provide hot water, three pilot dairy farms in Bulgaria will reduce their energy consumption. In addition, access to less expensive hot water will enable the farmers to use more hot water for proper washing and cleaning of the milking machines and other equipment. This will contribute to better milk quality and enable the farmers to sell their milk at higher prices.

The project is implemented in partnership with Norges Vel from Norway and Trakia University in Stara Zagora and funded through the green industry innovation programme in Bulgaria operated by Innovation Norway.

Project promoter: Foundation for Organic Agriculture Bioselena

Key results 2014-15

With programmes launching in Croatia at the end of April 2014 following the country's accession to the EEA, implementation is only getting underway. While it is difficult to define results so far, work is moving ahead at pace.

- ➔ Preparations have started in Šibenik for the establishment of iNavis – a new national resource centre for energy and marine research and innovation
- ➔ Work is underway in the multi-ethnic areas of Vukovar and Knin to support increased understanding between ethnic groups. This includes preparations for the establishment of a new integrated school in Vukovar
- ➔ Together with the Council of Europe, the efficiency of the judiciary will be supported through the rehabilitation of the court house in Karlovac
- ➔ Thirty projects focused on solidarity and social capital in local communities have been selected under the NGO Fund so far
- ➔ Social dialogue is being strengthened in partnership with the Norwegian Confederation of Trade Unions and the Confederation of Norwegian Enterprise. Activities taking place this year include a study visit to Norway, a training workshop and a national tripartite conference.

Priority areas of support

- Promote green business, education and research education in cooperation with Norwegian partners
- Improve the infrastructure and efficiency of court systems
- Promote increased understanding between ethnic groups in post-conflict communities
- Enhance the contribution of civil society to justice, democracy and sustainable development

Rural community entrepreneurship

Working with the Norwegian University College for Agriculture and Rural Development, the Environment Centre of Charles University (CUEC) is developing a training course supported by the scholarship programme designed to help people in rural communities develop their entrepreneurial skills.

Open to local government officers, masters students and rural entrepreneurs, the course will be delivered by specialists from both institutions in Cesky Krumlov Castle in rural South Bohemia. The castle's museum (pictured) was itself restored with programme support in 2008.

"It's about innovation through bottom-up development."

Jiří Dlouhý, project manager at CUEC

Project promoter: Environment Centre, Charles University

#1 ACHIEVEMENT Improving support for migrants and asylum seekers

870

people, including 640 unaccompanied children given temporary accommodation and medical care in 4 reception centres (3 in Athens and 1 in Patras)

2 700

migrants and asylum seekers given shelter and basic welfare support at the first reception centre in Evros on the Turkish border

#3 ACHIEVEMENT Alleviating poverty

4 700

people using the advisory helpline

1 263

children benefiting from day care services

5 000

food vouchers distributed

3 864

visits to health care specialists

#2 ACHIEVEMENT Strengthening civil society

18 000

receiving better access to basic and welfare services

4 000

people accessing social welfare services every day (including medical, mental health and addiction treatment services)

Project snapshot

Solidarity Now!

The Solidarity Centre in Athens is providing assistance to around 37 000 people worst hit by the economic crisis. According to EU figures, every third person in the country of 10.7 million is at risk of poverty or social exclusion. Free health care and medication, food vouchers, assistance when applying for jobs, legal aid and day care for children are some of the services that are offered free of charge at the centre.

Promoting human rights through fairy tales

Educating children about human rights at an early stage is of great importance for an inclusive society. As part of a project under the NGO programme, new Maltese-language cartoons have been produced with the aim of reinterpreting such fairy tales on a more positive note. Having been screened at local cinemas and distributed in all Maltese schools, the new cartoons are reaching children across the country.

Present at the launch of the cartoons, the President of Malta, Marie Louise Coleiro Preca, (pictured), welcomed the initiative, highlighting the importance of spreading messages of equality and non-discrimination, particularly among children.

Developing new cancer therapy

Together with researchers from Oslo University Hospital in Norway, a team of researchers at University of Wrocław are working to develop a new cancer therapy. The cooperation project is based on a long-term collaboration between the Polish and Norwegian researchers in the field of cancer research, which will prove mutually beneficial.

"Today's mainstream approach to cure cancer is the use of chemotherapy that harms both cancer and healthy cells. Our aim is to kill only the cancer cells and do that more effectively. This will reduce the side effects for the cancer patients. The Norwegian researchers are interested in the same protein as us, but we are looking at it from different angles and have different and complementary expertise. We will continue our cooperation after this project."

Professor Jacek Otlewski, University of Wrocław

Reducing emissions

Kogeneracja S.A., the heat and power plant located in the centre of Wrocław (pictured), produces electricity and provides heating for 60 per cent of the city's 600 000 inhabitants. EU legislation requires the coal and biomass-powered plant to reduce its emissions.

By installing a new filter system, the sulphur dioxide (SO₂) and dust emissions will be reduced significantly. The reduction of SO₂ from this plant per year is equivalent to almost 20 per cent of the total Norwegian SO₂ emissions for 2013. The result will be reduced acid rain locally and regionally, as well as improved air quality – benefiting both the environment and the inhabitants of Wrocław and in the wider region.

Norway provides funding for similar improvements to reduce the SO₂ emissions in Poland, contributing to a reduction of more than the annual Norwegian SO₂ emissions for 2013. Norway also supports projects to reduce CO₂ and other hazardous emissions in Poland.

Project promoter: CHP team Wrocław Kogeneracja S.A.

Grant amount: €4.76 million

projects on youth employment which are expected to help over 5 000 young people improve their skills and support more than 2 000 budding entrepreneurs

The NGO Fund Operator organised a large-scale international conference in Lisbon in November 2014 on "Youth Employment and Social Entrepreneurship: New Ways Forward"

#3 ACHIEVEMENT
Cultural footprint: arts and
education

5

cultural education projects developed with 8 Norwegian partners exporting the celebrated Norwegian 'cultural rucksack' concept

23

cultural events developed

30

artists and cultural professionals trained

300

schoolchildren attended art events

#2 ACHIEVEMENT
Exchanging knowledge
on geothermal energy
exploitation

12

students and professionals from the Azores participated in courses on exploration and exploitation of geothermal energy given by Iceland's United Nations University

Courses have taken place both in Iceland and the Azores

Project snapshot

Drawing on Icelandic geothermal experience

The National Energy Authority of Iceland is a partner in the €4 million GALa renewable energy programme, lending its expertise to build capacity as well as collaborating extensively in the planning and implementation. Led by Electricidade dos Açores (Azores Electricity), a pilot power plant is to be established at the Pico Alto Geothermal field to test the viability and sustainability of geothermal power generation.

Snapshot of projects

Social inclusion for Roma

Norway Grants has allocated €20 million to poverty alleviation in Romania. Donor project partners include the Norwegian branch of the Salvation Army and the City of Oslo.

One project focuses on the Pata Rata settlement on the outskirts of Cluj-Napoca. The Roma people living here have made their living from the collection and trading of waste on the local landfill site; the site will close in 2015. The project is helping 300 families living in the area prepare for the closure. A wide range of measures are helping people to have more control of their lives, from gaining access to adequate education, health and other social services, to building cooperation with different stakeholders, including civil society.

Project promoter: Intercommunity Development Association Cluj Metropolitan Area

Grant amount: €2 million

Project link: bit.ly/1dIW1U8

“Romania faces serious challenges relating to poverty and social exclusion, particularly among the Roma people. This is why we are allocating funds from the Norway Grants to improve their living conditions”

Vidar Helgesen, Norwegian Minister of EEA and EU Affairs

Therapeutic centre for women prisoners

Norway's Bredtveit women's prison is providing expertise for the development of a therapeutic community at Gherla women's prison, based on its best practices and experience in the area. The project involves developing special recovery programs to help prisoners reintegrate into society after they have served their sentence. The project will also improve the professional competence of prison staff in working with vulnerable groups. The project will bring benefits not just to Gherla, but more widely to the whole prison system in how to work with and assist vulnerable groups.

Project snapshot

Creating job opportunities for Roma

In Slovakia, the unemployment rate among the Roma population is around 80 percent. In the eastern part of the country, Iceland, Liechtenstein and Norway are helping create employment opportunities for the Roma through organic farming. The organic farm Malinka in Rudlov is being renovated and expanded, creating at least ten new jobs and helping to secure already existing ones.

"It is necessary to have a long-term perspective and to work systematically to help include marginalised groups like the Roma into society. We hope that our project can serve as inspiration for other projects in Slovakia."

Štefan Straka, Director, Svatobor

Conference: exchanging experience on European integration

An international conference entitled 'Different models of past and future European integration – a look from inside and outside the EU' was held in Ljubljana in October 2014. It brought together government representatives from Iceland, Liechtenstein, Norway, Slovenia and other countries across the EU, as well as from research institutions, NGOs and think tanks.

"Such forms of creative cooperation should continue to be developed, as they will benefit all partners."

Karl Erjavec, Minister of Foreign Affairs of Slovenia

NGO coalitions or networks developed, such as a new network promoting female social entrepreneurship

8

laws or policies changed or improved due to NGO advocacy work

Project snapshot

Female participation in politics

Despite some progress, women in Slovenia continue to be under-represented in politics and business. One project – OPENN – running under the gender programme is working to identify barriers that hinder greater female participation in politics. The aim is to propose some concrete solutions, which will include new proposals for legislation and awareness raising campaigns.

The Norwegian Association for Local and Regional Authorities is participating as a partner.

“Norway has had a relatively high percentage of female participation in politics at senior levels for many decades. We have seen how important that is, not only for democracy but also in helping to shape legislation, the welfare state and society in general.”

Liss Schanke, Norwegian Association for Local and Regional Authorities

Project promoter: Peace Institute

#2 ACHIEVEMENT Promoting female entrepreneurship

150

women from vulnerable groups taking part in job skills training

69

Gender balance improved in 69 company boards

6

schools have put equality plans in place

#4 ACHIEVEMENT Promoting cultural diversity and exchange

8

cooperation projects between cultural organisations from Spain and partners from the donor countries

19

artists and performers received grants to take part in an exchange with the donor countries

Project snapshot

More women in leadership

Only 17% of board members in the world's biggest companies are women. The 'Promociona' project, financed by Iceland, Liechtenstein and Norway, may be just one small step on the way to change this, but it's making big waves.

Promociona seeks to encourage a higher number of women executives on steering committees and boards of directors. The first round finished on 22 January 2015, with excellent results: 7 out of 40 women participants were promoted and a second round with a further 70 top female managers taking part is underway.

Forty female managers from some of the biggest companies in Spain including Renault, Iberdrola, Indra and Siemens received business training, mentoring and coaching in one of the best business schools in Spain in order to improve their skills. Engineer, Beatriz de Dios, Head of the Quality Department in Renault Valladolid, who was promoted after taking part in this project said:

"I must admit that when my company offered me the opportunity to take part in this project I hesitated because of the 'women only' label. But the experience couldn't have been more positive. The programme is very good and the management excellent."

Project promoter: Spanish Confederation of Business Organizations

Grant amount: €578 000

Project link: bit.ly/1RA4Izq

A scenic view of a city at sunset, with a blue callout box containing text. The sun is low on the horizon, casting a warm orange glow over the sky. The city below is partially obscured by lush green trees in the foreground. In the background, there are several buildings, including a prominent one with a tall chimney. The overall atmosphere is peaceful and serene.

This part provides an overview of the organisational structure and governance of the EEA and Norway Grants.

An aerial photograph of a cityscape. In the foreground, there are dense green trees. In the middle ground, a large, multi-story stone building with a flat roof is prominent. To the right, there are other buildings with dark roofs. In the background, a body of water is visible, with several cranes and industrial structures along the shore. The sky is a mix of orange and light blue, suggesting a sunset or sunrise. A white dashed line runs horizontally across the middle of the image, separating the top half from the bottom half.

MANAGING THE GRANTS

Managing the Grants

Organisational structure

Public institutions in the donor and beneficiary countries share responsibilities for managing the EEA and Norway Grants.

The **Financial Mechanism Committee (FMC)** is the decision-making body for the EEA Grants. The committee consists of representatives from the Ministries of Foreign Affairs of Iceland, Liechtenstein and Norway. The FMC draws up policy and guidelines, approves each programme allocation and ensures monitoring, control and evaluation of the Grants.

The **Norwegian Ministry of Foreign Affairs** is the decision-making body for the Norway Grants.

53
fixed-term
staff positions,
encompassing
13 different
nationalities

The **Financial Mechanism Office (FMO)** is the Brussels-based secretariat for the Grants. The FMO is affiliated with the European Free Trade Association (EFTA) and reports to the Foreign Ministries of Iceland, Liechtenstein and Norway. The FMO also serves as a contact

point for the beneficiary countries. As of 31 December 2014, the FMO had 53 fixed-term staff positions, encompassing 13 different nationalities.

Each beneficiary country has a **National Focal Point (NFP)**, responsible overall for achieving the objectives of the Grants, as well as overall management and control of their programmes. Most of the NFPs are located within relevant ministries, or public agencies that also have responsibility for managing EU funds. The NFP also represents the beneficiary country in its relations with the FMC and the Norwegian Ministry of Foreign Affairs regarding the Grants.

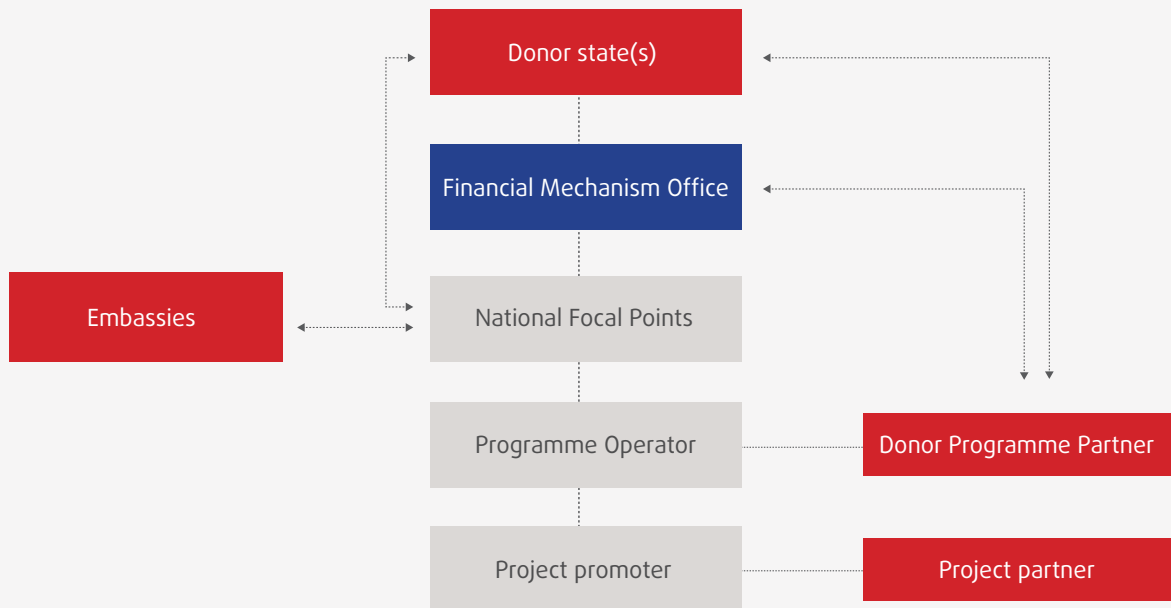

Each **Programme Operator (PO)** is responsible for awarding funding to projects according to agreed criteria, monitoring project implementation and achieving results. In most cases the PO is a public institution.

Programme Operators often work in close cooperation with a **Donor Programme Partner (DPP)**. DPPs are public bodies from Iceland, Liechtenstein and Norway with national mandates in their respective fields. They work with their counterparts in beneficiary countries to:

- provide expertise and strategic advice on programme planning and implementation
- facilitate networking and help project promoters find project partners in donor countries

Organisations involved in the management of the EEA and Norway Grants

Cooperation through bilateral programmes and projects provides an arena for exchange of knowledge, mutual learning from best practice and developing joint policies.

In total, there are 24 DPPs from Iceland, Liechtenstein and Norway involved in the current funding period. In addition to partners from the donor countries, the Council of Europe is also a DPP in a number of programmes.

24

DPPs from Iceland, Liechtenstein and Norway

The donor **Embassies** in the beneficiary countries, in particular those of Norway, take part in the dialogue between the donor and beneficiary countries and play an important role in communicating the results of the Grants.

- See Annex 3 for a list of Donor Programme Partners involved in each beneficiary country.
- Read more about our partnership with the Council of Europe and other international organisations in Part 1: Our cooperation.

Managing for results

Results-based management helps to ensure that programmes are more focused on what they will achieve and take an evidence-based approach to what works well and what could be improved.

In 2014/15, the focus has been on implementation. By end of April 2015, the disbursement rate stood at 46%. A total of 4 149 projects had been contracted, of which 1 056 (25%) had a donor project partner. More projects are still being prepared.

The Office of the Auditor General of Norway published an investigation into the contribution of the EEA and Norway Grants to achieving its objectives of reducing social and economic disparities in 2013.¹ The report found that the 2009 – 2014 programme approach with defined objectives and expected outcomes should improve the achievement of goals.

In line with the Auditor's recommendations, the number of performance indicators has been reduced and their quality improved. The FMO has also undertaken extensive training in beneficiary countries to improve the quality of information on projects and ensure that results are consistently and reliably reported. Reporting templates have been developed to focus annual reports on the achievement of results. Programme progress is regularly assessed through annual meetings and other visits based on a risk-based approach. A semi-annual risk assessment is undertaken which feeds into business processes.

1. http://www.riksrevisjonen.no/en/Reports/Documents/Documentbase_3_15_2012_2013.pdf

Good governance

Iceland, Liechtenstein and Norway are committed to the principles of good governance, including transparency, accountability, effectiveness and efficiency.

Monitoring and control systems

Each beneficiary country is obliged to establish a certifying authority and a separate auditing authority. These organisations are independent of the National Focal Point and must be established at the outset, before any funds are committed.

The management and control systems established in the beneficiary countries ensure reliable accounting, monitoring and financial reporting systems.

The auditing responsibility lies firstly with the beneficiary countries. The designated audit authority submits an audit strategy for each programme and reports annually on audits carried out. In addition, the FMO arranges audits and on-the-spot inspections of programmes and projects to verify the effective functioning of the management and control systems.

Irregularities

The donors have a zero-tolerance policy to corruption and mismanagement. In line with the public access and transparency policy, a quarterly irregularities report is made accessible to the public. If any resources are unduly paid or lost due to corruption, fraud or mismanagement, the beneficiary country is responsible for refunding the donor countries either by reclaiming it from the project promoter or from their own national funds.

Risk management

Risk management is an integral part of the management framework of the EEA and Norway Grants and a tool to help achieve goals and expected results. Transparency International (TI) is a strategic partner of the Grants and focuses on corruption prevention.

TI offers advice to the FMO and the National Focal Points and is helping to assess the potential exposure to corruption risk in the Grants. TI also participates in the annual risk seminar. In 2014, the seminar focused on results and risk management in the EEA and Norway Grants. Key findings and main mitigating actions highlighted in the reports on potential corruption risks in the beneficiary countries and programmes, prepared by TI, were also discussed.

Training and capacity building

In order to ensure a full understanding of roles, responsibilities and the regulation for the 2009-2014 funding period, a large number of seminars and workshops have been organised for those involved in the management of programmes including: Focal Points, Programme Operators, Donor Programme Partners, donor country embassies, potential beneficiaries and partners.

Donor management costs

The ceiling for donor management costs is 7.5% for the EEA and Norway Grants 2009 – 2014. In addition to management costs for running the FMO, this includes participation costs of donor programme partners, appraisal, monitoring, evaluation, audit and costs linked to the functions of the Financial Mechanism Committee.

The 2004 – 2009 Grants

In 2014, further progress was made to complete and formally close the 2004-2009 financial period. All projects in 11 out of 15 beneficiary countries were closed. Total disbursements at the end of 2014 were €1.1 billion. This is equivalent to an overall disbursement rate of 88% (compared to net allocations).

Table: Project status and disbursements per country by end-December 2014

Beneficiary State	Projects	Current commitment* (€ million)	Disbursement* (€ million)	Disbursed % of net allocation**

* Includes €70 million for the Polish energy efficiency programme which contributes towards the objectives of the climate change priority.

Annex 2

Explanatory notes on the indicators in the country overviews

Indicator	Description ¹
GDP per capita (in PPS)	Gross domestic product (GDP) reflects a country's economic situation: the total value of all goods and services produced less the value of goods and services used for intermediate consumption in their production. Expressing GDP in purchasing power standards (PPS) eliminates differences in price levels between countries while calculations on a per head basis allow for the comparison of economies significantly different in absolute size.
Economic growth (% change on previous year)	The calculation of the annual growth rate of GDP volume is intended to allow comparisons of the dynamics of economic development both over time and between economies of different sizes.
Unemployment rate (%)	Unemployment rates represent unemployed people as a percentage of the labour force. The labour force is the total number of people employed and unemployed.
Youth unemployment rate (%)	Unemployment rates represent unemployed persons aged 15-24 as a percentage of the labour force of the same age.
Public debt (% GDP)	Consolidated general government gross debt at nominal value, outstanding at the end of the year in the following categories of government liabilities: currency and deposits; securities other than shares excluding financial derivatives; and loans. General government sector comprises the sub-sector: central government; state government; local government; and social security funds.
Gender pay gap (%)	The unadjusted gender pay gap (GPG) represents the difference between average gross hourly earnings of male paid employees and of female paid employees as a percentage of average gross hourly earnings of male paid employees.
At-risk-of-poverty rate (%)	At risk of poverty or social exclusion is the percentage of the population who are at risk of poverty or who are severely materially deprived or living in households with very low work intensity.
Human development index (EU-28 ranking)	A composite index measuring average achievement in three basic dimensions of human development – a long and healthy life, knowledge and a decent standard of living.
Corruption perception index (EU-28 ranking)	The corruption perception index (CPI) is an aggregate indicator that brings together a number of different sources that capture perceptions of corruption within the past two years.
