Where any product originating in a Party, as a result of the reduction or elimination of a customs duty under this Agreement, is being imported into the territory of another Party in such increased quantities and under such conditions as to constitute a substantial cause of serious injury or threat thereof to the domestic industry of like or directly competitive products in the territory of the importing Party, the importing Party may take emergency measures to the minimum extent necessary to remedy or prevent the injury.

2. Such measures may consist in:

- (a) suspending the further reduction of any rate of duty provided for under this Agreement on the product; or
- (b) increasing the rate of duty on the product to a level not to exceed the lesser of:
  - (i) the most-favoured nation rate of duty in effect at the time the action is taken;
  - (ii) the most-favoured nation rate of duty in effect on the day immediately preceding the date of the entry into force of this Agreement.

3. The Parties shall not take emergency measures for a period exceeding one year. In very exceptional circumstances, after review by the Joint Committee, measures may be taken up to a total maximum period of three years. In this case, the Party taking such measures shall present a schedule leading to their progressive elimination. The Parties shall not apply measures to the import of a product which has previously been subject to such a measure for a period of, at least, five years since the expiry of the measure.

4. The Parties shall only take emergency measures upon clear evidence that increased imports have caused or are threatening to cause serious injury pursuant to an investigation in accordance with the procedures laid down in the WTO Agreement on Safeguards.

5. The Party intending to take emergency measures under this Article shall promptly make a notification to the other Parties, containing all pertinent information which shall include evidence of serious injury caused by increased imports, precise description of the

product involved, the proposed measure, the proposed date of introduction and expected duration of the measures. Any Party that may be affected shall simultaneously be offered compensation in the form of substantially equivalent trade liberalisation in relation to the imports from any such Party.

6. The Joint Committee shall, within 30 days from the date of notification to the Parties, meet to examine the information provided under paragraph 5, in order to facilitate a mutually acceptable solution of the matter. In the absence of such solution, the importing Party may adopt a measure pursuant to paragraph 2 to remedy the problem, and, in the absence of mutually agreed compensation, the Party against whose product the measure is taken may take retaliatory action. The emergency measure and any compensatory or retaliatory action shall be immediately notified to the Joint Committee. The retaliatory action shall consist of the suspension of concessions having substantially equivalent trade effects or concessions substantially equivalent to the value of the additional duties expected to result from the emergency action. In the selection of the emergency measure and the retaliatory action, priority must be given to the action which least disturbs the functioning of this Agreement.

7. In critical circumstances where delay would cause damage which would be difficult to repair, a Party may take a provisional emergency measure not exceeding 120 days pursuant to a preliminary determination that there is clear evidence that increased imports have caused or are threatening to cause serious injury. The Party intending to take such a measure shall immediately notify the other Parties thereof and, within 30 days of the date of such notification, the pertinent procedures set out in paragraphs 5 and 6, including for compensatory and retaliatory action, shall be initiated. Any compensation shall be based on the total period of application of the provisional measure. The period of application of any such provisional measure shall be counted as part of the duration of the definitive measure and any extension thereof.

1. For the purposes of monitoring the functioning of this Agreement and calculating preference utilisation rates, the Parties shall annually exchange import statistics and preferential tariff rates under this Agreement as well as applied most-favoured-nation (MFN) tariff rates.
2. Import statistics exchanged shall pertain to the three most recent years available and comprise all imports from the Party concerned, including trade values and volumes listed at the level of national tariff line. The Parties shall exchange separate statistics for imports benefitting from preferential treatment under this Agreement, for imports benefitting from other preferential treatment than under this Agreement as well as those that did not receive preferential treatment (MFN treatment). The preferential tariff rates and applied MFN tariff rates exchanged shall pertain to the same year as the import statistics. Upon request, the Parties shall exchange additional information and explanations in English.
3. The exchange of import statistics, preferential tariff rates and applied MFN tariff rates shall start one year after the entry into force of this Agreement.
4. Notwithstanding paragraph 2, no Party shall be obliged to exchange data that is confidential in accordance with its domestic laws and regulations.

ARTICLE 24

***Technical amendments***

1. The Parties shall jointly decide, as a result of amendments to the Harmonized Commodity Description and Coding System (HS) nomenclature or other technical amendments to a Party's customs tariff, whether Annexes III (Chile Schedule of Tariff Commitments), IV (Iceland Schedule of Tariff Commitments), V (Norway Schedule of Tariff Commitments) and VI (Switzerland Schedule of Tariff

Commitments) and Appendix I (Product-Specific Rules) to Annex I (Rules of Origin and Administrative Cooperation) will be amended accordingly.

2. Amendments pursuant to paragraph 1 shall be made without impairing existing tariff commitments or product-specific rules. Consequently, the customs duty applicable to the corresponding goods under a new tariff line shall be equal to or lower than the customs duty of the corresponding original tariff line and any other agreed tariff commitments, such as tariff dismantling periods, shall not deteriorate. Product-specific rules applicable to the corresponding goods under the new HS classification shall be equal to or less stringent than the product-specific rule of the corresponding original HS classification.

3. The version of the HS and the year shall be indicated in the schedules of tariff commitments and product-specific rules referred to in paragraph 1.

## ARTICLE 25

- (b) “customs authority” means the authority that, according to the domestic laws and regulations of a Party, is responsible for the implementation of its customs legislation;
- (c) “ex-works price” means the price paid for a product to the manufacturer in the Party where the last working or processing was carried out, in accordance with the international commercial terms “incoterms”, excluding internal taxes which may be reimbursed when the product is exported;
- (d) “Harmonized System” or “HS” means the Harmonized Commodity Description and Coding System;
- (e) “manufacture” means any kind of working or processing, including assembling;
- (f) “material” means any ingredient, raw material, component or part used in the manufacture of a product;

- (h) “product” means the result of manufacture, even if it is intended for later use as material in another manufacturing operation; and
- (i) “value” means the customs value determined in accordance with the Agreement on Implementation of Article VII of the General Agreement on Tariffs and Trade 1994 at the time of importation of the non-originating materials used, or, if this is not known and cannot be ascertained, the first ascertainable price paid for the materials in a Party.

## SECTION II

### CONCEPT OF “ORIGINATING PRODUCTS”

#### Article 2

##### *General requirements*

For the purposes of this Agreement, a product shall be considered as originating in a Party if:

- (a) it has been wholly obtained in a Party, in accordance with Article 3 (Wholly obtained products);
- (b) the non-originating materials used in the working or processing have undergone sufficient working or processing in a Party, in accordance with Article 4 (Sufficient working or processing);
- (c) it has been produced in a Party exclusively from materials originating in one or more Parties, in accordance with Article 6 (Accumulation of origin); or
- (d) it has been produced in a Party exclusively from materials as specified in subparagraphs (a) to (c).

#### Article 3

##### *Wholly obtained products*

The following products shall be considered as wholly obtained in a Party:

- (a) minerals and other naturally occurring substances extracted or taken from its soil, waters, seabed or beneath the seabed there;
- (b) vegetable products grown and harvested there;
- (c) live animals born and raised there;
- (d) products from live animals raised there;
- (e) products from slaughtered animals born and raised there;
- (f) products obtained by hunting, trapping, fishing or aquaculture conducted there;
- (g) products obtained there by using cell cultures<sup>1</sup>;

---

<sup>1</sup> For the purpose of this Annex, “cell culture” means a biotechnological process in which human, animal or plant cells are cultivated under controlled conditions (such as defined temperatures, growth medium, gas mixture, pH) outside a living organism.

- (h) products falling within Chapters 29 to 39 of the Harmonized System obtained there by fermentation<sup>2</sup>;
- (i) products of sea fishing and other marine products taken from the sea outside the territorial waters of any country, by a vessel registered in a Party and flying its flag, and products manufactured exclusively from such products, on board a factory ship registered in a Party and flying its flag;
- (j) products extracted from marine soil or sub-soil outside the territorial waters of a Party provided that this Party has the sole rights to exploit that soil or sub-soil;
- (k) waste and scrap resulting from manufacturing operations conducted there;
- (l) used products collected there fit only for the recovery of raw materials and not for their original purpose; or
- (m) products manufactured in a Party exclusively from materials listed in subparagraphs (a) to (l).

#### Article 4

##### ***Sufficient working or processing***

1. A product obtained from non-originating materials shall be considered to have undergone sufficient working or processing if the applicable product-specific rule of Appendix 1 (Product-specific rules) is fulfilled.
2. Notwithstanding paragraph 1, the operations defined in Article 5 (Insufficient working or processing) are considered as insufficient to obtain originating status.
3. The product-specific rules referred to in paragraph 1 indicate the working or processing which must be carried out on non-originating materials used in manufacturing and concern only such materials. It follows that if a product, which has acquired originating status in accordance with paragraph 1 in a Party, is further processed in that Party and used as material in the manufacture of another product, no account shall be taken of the non-originating components of that material.
4. Where a rule set out in Appendix 1 (Product-specific rules) is based on compliance with a sufficient processing threshold or a maximum content of non-originating materials, the value of non-originating materials used in the production of the product may be calculated on an average basis over a period of the preceding fiscal year in order to take into account the fluctuations in costs or currency rates, subject to the domestic requirements of the exporting Party.

---

<sup>2</sup> For the purpose of this Annex, “fermentation” means a biotechnological process in which human, animal or plant cells, bacteria, yeasts, fungi or enzymes are used in the production process.

Article 5

***Insufficient working or processing***

1. Notwithstanding Article 4 (Sufficient working or processing), a product shall not be considered as originating, if it has only undergone one or more of the following operations or processes:

- (a) preserving operations to ensure that a product retains its condition during transport and storage and operations whose sole purpose is to ease loading;
- (b) freezing or thawing;
- (c) breaking-up, packaging, re-packaging or assembly of packages;
- (d) washing, cleaning, removal of dust, oxide, oil, paint or other coverings;
- (e) ironing or pressing of textiles or textile products;
- (f) simple painting and polishing;
- (g) husking, partial or total bleaching, polishing, and glazing of cereals and rice;
- (h) colouring of sugar or forming sugar lumps;
- (i) peeling and removal of stones, cores, pips and shells from fruits, nuts and vegetables;
- (j) sharpening, simple grinding or simple cutting;
- (k) sifting, screening, sorting, classifying, grading, matching;
- (l) simple placing in bottles, cans, flasks, bags, cases, boxes, fixing on cards or boards and all other simple packaging operations;
- (m) affixing or printing marks, labels, logos and other like distinguishing signs on products or their packaging;
- (n) simple mixing of products, whether or not of different kinds;
- (o) simple assembly of parts of articles to constitute a complete article or disassembly of products into parts; or
- (p) slaughter of animals.

2. For the purposes of paragraph 1, “simple” describes operations or processes which need neither special skills nor machines, apparatus or equipment especially produced or installed to carry out the operation or process.

3. All operations or processes carried out in a Party on a product shall be taken into account when determining whether these operations or processes are considered as insufficient working or processing in accordance with paragraph 1.

## Article 6

### *Accumulation of origin*

1. A product originating in a Party, which is used as material in the manufacture of a product in another Party, shall be considered as originating in the Party where the last operations beyond those referred to Article 5 (Insufficient working or processing) have been carried out.

2. A product originating in a Party, which is exported from one Party to another and does not undergo working or processing beyond those referred to in paragraph 1 of Article 5 (Insufficient working or processing), shall retain its origin.

3. Where materials originating in two or more Parties are used in the manufacture of a product and these materials have not undergone any working or processing beyond the operations referred to in Article 5 (Insufficient working or processing), the origin of the product is determined by the material with the highest value, or if this cannot be ascertained, with the highest first ascertainable price paid for that material in that Party.

4. Notwithstanding paragraph 1, products imported from a non-Party, which are used as materials in the manufacture of a product in an EFTA State or Chile, shall be considered as originating in the Party where the last operation has been carried out, provided that:

- (a) preferential trade agreements in accordance with Article XXIV of the GATT 1994 between the EFTA State concerned, Chile and that non-Party, which foresee certification of origin and administrative cooperation procedures, including procedures for verification of originating status, are in force;
- (b) these materials qualify as originating materials under the preferential trade agreement between that non-Party and the Party where the last operation has been carried out; and
- (c) the working or processing carried out in the EFTA State concerned or Chile goes beyond those referred to in paragraph 1 of Article 5 (Insufficient working or processing). Such materials do not have to undergo sufficient working or processing.

## Article 7

### *Tolerances*

1. If non-originating materials used in the production of a product do not satisfy the requirements set out in Appendix 1 (Product-specific rules), the product shall be considered as originating in a Party, provided that the value of all those non-originating materials does not exceed 20 % of the ex-works price of the product.
2. Paragraph 1 shall not apply if the value of non-originating materials used in the production of a product exceeds any of the percentages for the maximum value of non-originating materials as specified in the requirements set out in Appendix 1 (Product-specific rules).
3. Paragraph 1 shall not apply to products wholly obtained in a Party in accordance with Article 3. If Appendix 1 (Product-specific rules) requires that the materials used in the production of a product are wholly obtained, paragraphs 1 and 2 shall apply.

## Article 8

### *Unit of qualification*

1. For the purpose of determining the originating status, the unit of qualification of a product or material shall be determined in accordance with the Harmonized System.
2. Pursuant to paragraph 1:
  - (a) packaging shall be included with a product if it is included with that product in accordance with General Interpretative Rule 5 of the General Rules for the Interpretation of the Harmonized System (General Interpretative Rules). Packing materials and containers for shipment that are used to protect a product during transportation shall be disregarded in determining whether a product is originating; and
  - (b) where a consignment consists of a number of identical products classified under a single heading or sub-heading of the Harmonized System, each product shall be considered separately.

## Article 9

### *Accessories, spare parts and tools*

Accessories, spare parts, tools and instruction and information material dispatched with a piece of equipment, machine, apparatus or vehicle which are part of the normal equipment and included in its ex-works price, or which are not separately invoiced, shall be considered as part of the product in question.

## Article 10

### *Neutral elements*

Neutral elements, which have not entered into the final composition of the product, such as energy and fuel, plant and equipment, or machines and tools, shall not be taken into account when the origin of that product is determined.

#### Article 11

##### *Sets*

Sets, in accordance with General Interpretative Rule 3 of the Harmonized System, shall be regarded as originating when all components of the set are originating products. When a set is composed of originating and non-originating products, the set as a whole shall however be regarded as originating, provided that the value of the non-originating products does not exceed 15 % of the ex-works price of the set.

#### Article 12

##### *Accounting segregation*

1. If originating and non-originating fungible materials are used in the working or processing of a product, the determination of whether the materials used are originating may be determined on the basis of an accounting segregation system, and may be subject to prior authorisation by the customs authority of the Party concerned.
2. For the purposes of paragraph 1, “fungible materials” mean materials that are of the same kind and commercial quality, with the same technical and physical characteristics, and which cannot be distinguished from one another once they are incorporated into the finished product.
3. The accounting segregation system must ensure that no more final products receive originating status than would have been the case if the materials had been physically segregated.
4. A producer using an accounting segregation system must keep records of the operation of the system that are necessary for the customs authority of the Party concerned to verify compliance with the provisions of this Annex.
5. The authorisation to use accounting segregation may be withdrawn by the customs authority at any time if the producer makes improper use of it.

## SECTION III

### TERRITORIAL REQUIREMENTS

#### Article 13

##### *Principle of territoriality*

1. The conditions for acquiring originating status set out in the provisions of Section II (Concept of “Originating Products”) must be fulfilled without any interruption in the territory of a Party.

2. Notwithstanding paragraph 1, if an originating product is returned to the exporting Party after having been exported to a non-Party without having undergone any operation there, beyond those necessary to preserve its condition, that product shall retain its originating status. The customs authority of the importing Party may require evidence that the returned product did not undergo any operation outside the exporting Party, beyond those necessary to preserve its condition.

3. Notwithstanding paragraph 1, the acquisition of the originating status of a product in accordance with the provisions of Section II (Concept of “Originating Products”) shall not be affected by operations carried out in a non-Party under an outward processing procedure or a similar arrangement, if:

- (a) the re-imported materials have been obtained from the exported materials; and
- (b) the total added value acquired in the non-Party does not exceed 20 % of the ex-works price of the product; and
- (c) the total value of the non-originating materials incorporated in a Party, taken together with the total added value acquired outside that Party, does not exceed the value allowed in accordance with Appendix 1 (Product-specific rules).

4. For the purposes of subparagraph 3(b), “total added value” means all costs arising outside a Party, including transport costs and the value of non-originating materials incorporated there.

#### Article 14

##### *Non-alteration*

1. Originating products, for which preferential tariff treatment is requested in a Party, shall be the same products as exported from another Party. They must not be altered or transformed in any way nor undergo operations other than those to preserve their condition, adding or affixing marks, labels, seals or any documentation to ensure compliance with domestic requirements of the importing Party, prior to being declared for preferential tariff treatment.

2. Transit, storage and splitting of consignments may take place in a non-Party, provided they remain under customs supervision in that non-Party.

3. Paragraphs 1 and 2 shall be considered fulfilled, unless the customs authority of the importing Party has reason to believe the contrary. In such case, the customs authority of the importing Party may request the importer or his or her representative to provide appropriate evidence of compliance, which may be given by any means, including contractual transport documents such as bills of lading, or factual or concrete evidence based on marking or numbering of packages, or any other evidence.

## SECTION IV

### PROOF OF ORIGIN

#### Article 15

##### *Statement on origin*

1. For the purpose of obtaining preferential tariff treatment in the importing Party, a proof of origin in the form of a statement on origin in accordance with Appendix 2 (Statement on Origin) must be completed by an exporter established in a Party for products originating in any Party and otherwise fulfilling the requirements of this Annex.

2. The statement on origin must be completed on an invoice or any other commercial document that identifies the exporter and the originating products, and, except as provided for in Article 16 (Approved exporter), bear the original signature of the exporter. Non-approved exporters should preferably indicate the tariff classification at four-digit level under the Harmonized System on the invoice or other commercial document, unless the total value of the originating products in the consignment does not exceed 6000 euro.

3. The statement on origin may be completed when the products to which it relates are exported, or after exportation. A statement on origin shall be valid one year from the date of completion.

4. Subject to domestic laws and regulations of the exporting Party, forwarding agents, customs brokers and other persons have to be empowered in writing by the exporter of the product to complete statements on origin. They must submit the said authorisation to the customs authorities, at their request.

5. An exporter who has completed a statement on origin must keep a copy of the statement on origin and all documents supporting the originating status of the product, in paper or electronic form, for at least three years from the date of completion.

#### Article 16

##### *Approved exporter*

1. The competent authority of the exporting Party may, subject to domestic requirements, authorise an exporter of that Party to complete a statement on origin without signature.
2. An exporter who requests such authorisation must offer, to the satisfaction of the competent authority of the exporting Party, all guarantees necessary to verify the originating status of the products as well as the fulfilment of any other requirement under this Annex.
3. The competent authority of the exporting Party shall provide to the approved exporter an authorisation number to be included in the statement on origin instead of the signature.
4. The competent authority of the exporting Party may verify the proper use of an authorisation and withdraw it if the exporter no longer fulfils the conditions or otherwise makes improper use of it.

## SECTION V

### PREFERENTIAL TREATMENT

#### Article 17

##### *Importation requirements*

1. Each Party shall grant preferential tariff treatment in accordance with the Agreement to originating products of a Party imported from another Party, on the basis of a statement on origin referred to in Article 15 (Statement on origin).
2. In order to obtain preferential tariff treatment, the importer must, in accordance with the procedures applicable in the importing Party, request preferential tariff treatment at the time of importation of an originating product.
3. A delayed claim for preferential tariff treatment may also be granted, where applicable, as provided for in the domestic laws and regulations of the EFTA State concerned, and as provided for in Chile's regulation by refund of duties within a period of two years from the date of acceptance of the import declaration.
4. A statement on origin must be submitted to the customs authority of the importing Party within one year from its completion. The expiration of this period may be suspended as long as the products covered by that statement on origin remain under customs control of the importing Party. After this period, a statement on origin may only be accepted in exceptional circumstances.
5. Notwithstanding paragraph 1, a Party may, in accordance with its domestic laws and regulations, waive the requirements to present a statement on origin.

6. An importer who has been granted preferential tariff treatment must keep the statement on origin and other relevant documents for three years in the EFTA States and for five years in Chile from the date on which preferential tariff treatment was granted.

#### Article 18

##### *Importation by instalments*

Where, at the request of an importer and subject to the conditions laid down by the customs authority of the importing Party, a dismantled or non-assembled product within the meaning of General Interpretative Rule 2(a) is imported by instalments, a single statement on origin may be submitted to the customs authority upon importation of the first instalment. Alternatively, a statement on origin may be submitted for each imported instalment.

#### Article 19

##### *Cooperation of exporters and importers with the customs authority*

1. Exporters and importers benefitting from the Agreement must cooperate, within the framework of this Annex and subject to domestic laws and regulations of the Party concerned, with the customs authority of the Party in which they are established and must submit, upon request, supporting documents regarding the fulfilment of the requirements of this Annex.
2. An exporter who has completed a statement on origin must:
  - (a) upon request of the customs authority of the exporting Party, submit the documents referred to in paragraph 5 of Article 15 (Statement on origin) to this authority, which may carry out inspections at any time and verify the accounts of the exporter or the producer and take other appropriate measures; and
  - (b) when becoming aware of or having reason to believe that a statement on origin contains incorrect information, immediately notify the importer and the customs authority of the exporting Party of any change affecting the originating status of each product covered by that statement on origin.
3. An importer who has requested or has been granted preferential tariff treatment must:
  - (a) upon request of the customs authority of the importing Party, submit the documents referred to in paragraph 3 of Article 14 (Non-alteration) to that authority; and
  - (b) when becoming aware of or having reason to believe that the statement on origin contains incorrect information, immediately notify the customs

authority of the importing Party of any change affecting the originating status of each product covered by that statement on origin.

## Article 20

### *Denial of preferential treatment*

1. An importing Party may deny preferential tariff treatment or recover unpaid customs duties in accordance with its domestic laws and regulations where a product does not fulfil the requirements of this Annex or where the importer or exporter fails to demonstrate compliance with these requirements.
2. Slight discrepancies between the statements made in the statement on origin and those made in other documents submitted to the customs authority for customs clearance or obvious formal errors, such as typing errors in a statement on origin, shall not as such render the statement on origin invalid, provided that they do not create doubts concerning the accuracy of the information contained in the import documentation and that they do not affect the originating status of the goods itself.
3. An incorrect HS-code mentioned in any of the accompanying documents, including the statement on origin, shall not as such be a reason for rejecting a claim for preferential treatment.

## **SECTION VI**

### **ADMINISTRATIVE COOPERATION**

## Article 21

### *Verification of statements on origin*

1. The customs authority of the exporting Party shall carry out verifications of statements on origin upon request of the customs authority of the importing Party. The request and any subsequent communication, including the result, may be submitted through letter mail or via electronic means.
2. The verification request may question the authenticity of the statement on origin, the originating status of the product concerned or the fulfilment of any other requirements of this Annex. It shall identify the reason for the request and include a copy of the statement on origin and, where appropriate, any other document or information giving reason to believe that the statement on origin could be invalid.
3. The importing Party shall submit the verification request to the exporting Party within 34 months from the completion of the statement on origin. The exporting Party shall not be obliged to conduct verifications based on verification requests received after this period.

4. The customs authority of the importing Party may, subject to domestic laws and regulations, suspend preferential tariff treatment to a product covered by a statement on origin until the verification procedure has been completed.

5. The customs authority of the exporting Party may request evidence, carry out inspections at the exporter's or producer's premises, check the exporter's and the producer's accounts and take other appropriate measures to verify compliance with this Annex.

6. The requesting Party shall be informed of the results and findings of the verification within 15 months from the date of the verification request. If the requesting Party does not receive a reply within that time limit, or if the reply does not clearly state whether a product is originating or whether the statement on origin is valid, the requesting Party may deny preferential tariff treatment to the consignment covered by the statement on origin in question.

7. Where the requested Party is unable to comply with the time limit referred to in paragraph 6, it shall, upon request within that time limit, be granted an extension thereof.

## Article 22

### *Notifications and cooperation*

1. The Parties shall provide each other, through the EFTA Secretariat, with:
  - (a) the addresses of the customs authority of the Parties responsible for the verifications referred to in Article 21 (Verification of statements on origin) and other issues related to the implementation or application of this Annex;
  - (b) information on authorisation numbers allocated to approved exporters, pursuant to Article 16 (Approved exporter);
  - (c) information on the interpretation, application and administration of this Annex; and
  - (d) information on the electronic verification procedure.
2. The Parties shall provide, through the EFTA Secretariat, information regarding the entry into force of a new preferential trade agreement which they have concluded pursuant to Article 6 (Accumulation of origin).
3. The Parties shall endeavour to resolve technical matters related to the implementation or application of this Annex, to the extent possible, through direct consultations between the customs authorities referred to in subparagraph 1(a) or in the Sub-Committee on trade in goods. Disputes that cannot be settled through such consultations shall be submitted to the Joint Committee.

Article 23

***Confidentiality***

Any information in relation with this Annex, which is by nature confidential, or which is provided on a confidential basis, shall be protected in accordance with the domestic laws and regulations of each Party. Such information shall not be disclosed by the authorities of the Parties without the explicit permission of the person or authority providing it.

**SECTION VII**

**FINAL PROVISIONS**

Article 24

***Penalties***

Each Party shall provide for the imposition of criminal, civil or administrative penalties for violations of its domestic laws and regulations related to this Annex.

Article 25

***Products in transit or storage***

This Annex may be applied to products which, upon entry into force of the Protocol Amending the Free Trade Agreement between the EFTA States and the Republic of Chile, Done at Geneva, this 24th day of June 2024, are either in transit or in temporary storage in a customs warehouse or free zone under customs control. For such products, a statement on origin may be completed retrospectively up to six months after the entry into force of the Agreement, provided that the provisions of this Annex and in particular of Article 14 (Non-alteration) have been fulfilled.

---

## **APPENDIX 1**

REFERRED TO IN ARTICLES 4, 7 and 13 OF ANNEX I

PRODUCT-SPECIFIC RULES

APPENDIX 1 TO ANNEX I  
PRODUCT-SPECIFIC RULES

**SECTION I**

**INTERPRETATIVE NOTES**

1. The product-specific rules (PSR) of origin set out in this Appendix are based on HS 2022. The first column of the list contains chapters, headings or sub-headings and the second column sets out a description of the products. For each entry in the first two columns, one or two rules are specified in column 3. If the HS code in column 1 is preceded by an “ex”, this means that the rules in column 3 apply only to the part of that chapter, heading or sub-heading described in column 2. Where, for an entry in the first two columns, more than one rule is specified in column 3, either one may be applied.
2. The PSR may be fulfilled by operations in more than one company within a Party, if these operations, taken together, fulfil the requirements of Annex I (Rules of Origin and Administrative Cooperation).
3. A PSR of origin set out in this Appendix represents the minimum amount of working or processing required to be carried out on non-originating materials for the final product to achieve originating status. A greater amount of working or processing than that required by the rule shall also confer originating status.
4. If a PSR in the list specifies that a product may be manufactured from more than one material, any one or more materials may be used. It does not require that all be used.
5. If a PSR in the list specifies that a product must be manufactured from a particular material, the condition does not prevent the use of other materials in addition.
6. If a PSR excludes materials classified in certain chapters, headings, or sub-headings, those materials must be originating for the products to qualify as originating.
7. If a product, which has acquired originating status by fulfilling the conditions set out in the list, is used as material in the manufacture of another product, the conditions applicable to the final product do not apply to that material. No account shall be taken of the non-originating components of that material.
8. If a PSR uses the expression “Manufacture from materials of any heading”, then materials of any heading, even materials of the same description and heading as the final product, may be used, subject to any specific limitations which may also be contained in the PSR.
9. The products mentioned in the list do benefit from preferential treatment, subject to the schedules of tariff commitments.

## SECTION II

### NOTE REFERRING TO CHAPTERS 27 TO 40

1. If a substantial transformation of a molecule has occurred, the origin of the product concerned shall correspond to the Party where that transformation took place.
2. The main method for determination of origin should normally be the rule of change of tariff classification. If that rule cannot be applied, the alternative approaches shall be applied in the following sequence:
  - (a) chemical reaction;
  - (b) mixing and blending;
  - (c) purification;
  - (d) change in particle size;
  - (e) standard materials;
  - (f) isomer separation.
3. For the purposes of paragraph 2:
  - (a) “change in particle size” means, for the purposes of chapters 30 to 32 and heading 38.22: deliberate and controlled modification in particle size of a product, other than by merely crushing or pressing, resulting in a product having a defined particle size, defined particle size distribution or defined surface area, which are relevant to the purposes of the resulting product and have different physical or chemical characteristics from the input materials;
  - (b) “chemical reaction” means a process, including a biochemical process, which results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of the molecule. A chemical reaction may also be expressed by a change of the “CAS number”. It does not mean:
    - (i) dissolving in water or other solvents;
    - (ii) elimination of solvents including solvent water; or
    - (iii) addition or elimination of water of crystallisation;

## **APPENDIX 3**

EXPLANATORY NOTES TO ARTICLE 15 REFERRED TO IN  
ANNEX I

STATEMENT ON ORIGIN

APPENDIX 3 TO ANNEX I

EXPLANATORY NOTES TO ARTICLE 15 (STATEMENT ON ORIGIN)

**Article 15 – Documentary evidence for used products**

Evidence of origin may be issued also for used or any other products where, because of a considerable time lapse between the date of production on the one hand and the date of exportation on the other hand, the usual supporting documents are no longer available, provided that:

- (a) the date of production or importation of the products lies beyond that period of time during which, according to the respective legislation in the country of exportation, records must be kept by traders;
- (b) the products can be deemed to be originating on the grounds of other evidence, like declarations by the producer or any other trader, expert opinions, marks on the products, or descriptions of them, etc;
- (c) there is no indication that the products do not comply with the requirements of the origin rules.

**Article 15 – Practical application of the provisions concerning statements on origin**

The following guidelines shall apply:

- (a) the indication of non-originating products and therefore products which are not covered by the statement on origin should not be made in the statement on origin itself. However, this indication should appear on the commercial document containing the statement on origin in a precise way so as to avoid any misunderstandings;
- (b) statements on origin made on photocopied commercial documents are acceptable, provided such statements bear the exporter's signature under the same conditions as the original. Approved exporters, who are authorised not to sign statements on origin, are not required to sign statements on origin made on photocopied commercial documents;
- (c) a statement on origin on the reverse of the commercial document is acceptable;
- (d) the statement on origin may be made on a separate sheet of the commercial document, provided that the sheet is considered to be an integral part of that commercial document. A complementary form may not be used;

- (e) a statement on origin completed on a label, which is subsequently attached to the commercial document, is acceptable, provided there is no doubt that the label has been affixed by the exporter. For example, the exporter's stamp or signature should cover both the label and the commercial document.

NORWAY SCHEDULE OF TARIFF COMMITMENTS

COMMITMENTS OF NORWAY ON GOODS ORIGINATING IN CHILE

ANNEX V

REFERRED TO IN ARTICLE 9 (Customs Duties)

NORWAY SCHEDULE OF TARIFF COMMITMENTS

COMMITMENTS OF NORWAY ON GOODS ORIGINATING IN CHILE

The following terms and conditions apply to the tariff commitments granted by Norway to Chile in accordance with this Annex:

1. For goods originating in Chile referred to as “NAMA” (Non-Agricultural Products) in column 3, Norway shall, upon entry into force of this Agreement, eliminate all import duties and charges having equivalent effect to import duties, as set out in columns 4a or 4b.
2. For goods originating in Chile referred to as “BAP” (Basic Agricultural Products) and “PAP” (Processed Agricultural Products) in column 3, Norway shall apply import duties as set out in columns 4a or 4b.
3. For goods originating in Chile referred to as “PAP” (Processed Agricultural Products) in column 1, the following provisions apply:
  - a. In order to take account of differences in the cost of the agricultural raw materials, the duty, levied upon import, shall be based on, but not exceed, the differences between the domestic price in Norway and the world market price of the agricultural raw materials incorporated into the goods concerned.
  - b. Subject to the provisions in subparagraph (a), Norway shall accord for goods referred to as PAP in column 1 of the table, originating in Chile, the same treatment as given to the European Union (EU). The commitments set out in the table for PAP are the same concessions as granted to the EU as of 1 January 2023. If the commitments for these goods are changed in the agreement between Norway and the EU<sup>1</sup>, Chile will simultaneously get identical commitments.
  - c. Norway shall publish the applicable import duties for processed agricultural products on the Website of the EFTA Secretariat.
4. For goods referred to as “NC” (not covered) in columns 4a or 4b, no commitments related to import duties are granted by Norway.

---

<sup>1</sup> Protocol 3 to the Agreement on the European Economic Area

5. The classification of goods shall be that set out in the tariff nomenclature of Norway in conformity with the Harmonized Commodity Description and Coding System (HS 2022).
6. Norway shall, based on an end-use criteria, accord duty-free market access to fish feed and raw materials for making fish feed, originating in Chile

SWITZERLAND SCHEDULE OF TARIFF COMMITMENTS

COMMITMENTS OF SWITZERLAND ON GOODS ORIGINATING IN CHILE

The following terms and conditions apply to tariff commitments granted by Switzerland in accordance with this Annex:

1. For goods originating in Chile indicated as “NAMA” (Non-Agricultural Products) in column 3, Switzerland shall upon entry into force of the Agreement, eliminate all customs duties on imports and charges having equivalent effect to customs duties on imports, as set out in column 5.
2. For goods originating in Chile indicated as “AG” (Agricultural Products) in column 3, Switzerland shall apply customs duties on imports as set out in column 5 or 6.
3. For goods originating in Chile indicated as “PCM” (Price Compensation Mechanism) in column 5:
  - a. The duty levied upon import shall be based on, but not exceed, the difference between the domestic price in Switzerland and the world market price of the agricultural raw materials incorporated into the goods concerned.
  - b. Switzerland shall publish the applicable customs duties on imports for goods indicated as “PCM” on the Website of the EFTA Secretariat.
  - c. Taking into account letters (a) and (b), Switzerland shall, based on reviews that can be requested by either side, accord for goods indicated as “PCM”, originating in Chile, treatment no less favourable than that accorded to the European Union.
4. For tariff concessions in column 6, Switzerland shall reduce the MFN duty rate applicable at the time of importation by the amount specified in that column.
5. For goods indicated as “NC” (not covered) in columns 5 and 6, no commitments related to customs duties on imports are granted by Switzerland.
6. The classification of goods shall be that set out in the tariff nomenclature of Switzerland in conformity with the Harmonized Commodity Description and Coding System in its 2022 version or any subsequent amendment thereto approved by the Parties.

INCORPORATION OF ANNEX VII<sup>ter</sup>

TRADE FACILITATION

**ANNEX VII<sup>ter</sup>**

REFERRED TO IN ARTICLE 16

TRADE FACILITATION

ANNEX VIIter

TRADE FACILITATION

Article 1

***General principles***

1. The Parties, aiming to serve the interests of their respective business communities and to create a trading environment allowing them to benefit from the opportunities offered by the Agreement, agree that in particular the following principles are the basis for the development and administration of trade facilitation measures by their competent authorities:

- (a) transparency, efficiency, simplification, harmonisation and consistency of exportation, importation and transit procedures;
- (b) consistent, impartial, predictable and reasonable administration of laws, regulations and administrative decisions relevant to trade in goods;
- (c) promotion of international standards;
- (d) consistency with relevant multilateral instruments;
- (e) best possible use of information technology;
- (f) high standards of public service;
- (g) governmental controls based on risk management;
- (h) cooperation within each Party among customs and other border authorities;  
and
- (i) consultations between the Parties and their respective business communities.

2. For greater certainty, nothing in this Annex shall be construed as to diminish the rights and obligations of the Parties under Articles 14 (Sanitary and phytosanitary measures) and 15 (Technical regulations) of the Agreement.

Article 2

***WTO Agreement on trade facilitation***

For the purposes of this Annex, Section I of the WTO Agreement on trade facilitation is hereby incorporated into and made part of the Agreement, *mutatis mutandis*.

Article 3

***Transparency***

1. Each Party shall promptly make available, as far as practicable in English, on the internet:
  - (a) all domestic laws, regulations, administrative decisions of general application and procedures relevant to trade in goods;
  - (b) a description of its exportation, importation and transit procedures that informs interested parties of the practical steps needed to trade or transit goods, including contact information on enquiry points; and
  - (c) information on border-crossing requirements.
2. Each Party shall establish enquiry points for customs and other matters relevant to trade in goods, which may be contacted in English through the internet. Enquiries in English shall be answered in English. The Parties shall not require any fee for answering enquiries.

Article 4

***Public consultation and information before entry into force***

1. Each Party shall consult its business community on its needs with regard to the development and implementation of trade facilitation measures, giving particular attention to the interests of small and medium-sized enterprises.
2. Each Party shall, to the extent practicable and in a manner consistent with its domestic legal system, publish in advance, and on the internet, any proposed laws and regulations relevant to trade in goods, with a view to affording interested persons an opportunity to comment on them.
3. Each Party shall, to the extent practicable and in a manner consistent with its domestic legal system, ensure that a reasonable time period is provided between the publication of laws and regulations relevant to trade in goods and their entry into force.
4. Paragraphs 1 to 3 shall not apply to:
  - (a) measures having a relieving effect;
  - (b) measures the effectiveness of which would be undermined as a result of compliance with paragraphs 1 to 3;
  - (c) measures applied in urgent circumstances; and
  - (d) minor changes to domestic laws and regulations.

Article 5

***Advance rulings***

1. A Party shall, in a reasonable time bound manner, issue a binding, written advance ruling upon written request, which contains all necessary information requested by the applicant<sup>1</sup> with regard to:
  - (a) tariff classification and the applied rate of duty of a product, including the method used to calculate the amount of duties;
  - (b) the appropriate method or criteria and the application thereof, to be used for determining the customs value under the facts presented by the applicant<sup>2</sup>;
  - (c) any fees and charges applied by customs or, where appropriate, information on the way such fees and charges are calculated;
  - (d) applicable border-crossing customs requirements for a specific product;
  - (e) applicable rules of origin; and
  - (f) other matters as the Parties may agree.
2. Each Party shall endeavour to make information on advance rulings publicly available, taking into account the need to protect confidential information.

Article 6

***Procedures for appeal***

Each Party shall ensure that any person to whom customs or another border authority issues an administrative decision has the right to at least:

- (a) one level of independent administrative appeal, unless the administrative decision has been taken by the highest administrative entity; and
- (b) one level of independent judicial appeal.

Article 7

***Fees and charges***

---

<sup>1</sup> For greater certainty, an importer, exporter, or producer may submit a request for an advance ruling through a duly authorised representative.

<sup>2</sup> Switzerland applies customs duties based on weight or quantity rather than *ad valorem* duties.

1. Fees and charges of whatever character, other than import duties and other than taxes within the purview of Article III of the GATT 1994, imposed by the Parties in connection with importation, exportation or transit, including tasks provided under Article 5 (Advance Rulings), shall be limited in amount to the approximate cost of services rendered and shall not represent an indirect protection to domestic goods or a taxation of imports or exports for fiscal purposes.
2. The fees and charges referred to in paragraph 1 shall not be calculated on an *ad valorem* basis.
3. Each Party shall publish information on fees and charges on the internet, as far as practicable in English. Such information shall include the service provided, the responsible authority, the fees and charges that will be applied and how they are calculated, as well as when and how payment has to be made.
4. Upon request, the customs authorities or other competent authorities of a Party shall provide information on fees and charges applicable to imports, exports or transit of goods, including the methods of calculation.

#### Article 8

##### ***Penalty disciplines***

1. Each Party shall ensure that penalties for breaches of its customs laws, regulations, or procedural requirements are imposed only on the person or persons legally responsible for the breach.
2. The penalty imposed shall depend on the facts and circumstances of the case and shall be commensurate with the degree and severity of the breach.
3. No Party shall impose substantial penalties for minor breaches of customs regulations or procedural requirements. In particular, no penalty for any omission or mistake in customs documentation, which is easily rectifiable and obviously made without fraudulent intent or gross negligence, shall be greater than necessary to serve merely as a warning.
4. Each Party shall ensure that when a penalty is imposed for a breach of customs laws, regulations, or procedural requirements, an explanation in writing is provided to the person or persons upon whom the penalty is imposed, specifying the nature of the breach, the basis for the penalty and instructions on the rights to appeal.
5. Each Party shall consider whether the voluntary disclosure to the competent authorities of the circumstances of a breach of a customs law, regulation, or procedural requirement prior to the discovery of a breach by the authority, can be regarded as a mitigating factor or not.
6. Each Party shall specify in its domestic laws and regulations a limited period within which it may initiate penalty proceedings in connection with a breach of a customs law, regulation, or procedural requirement.

7. Each Party shall maintain procedures to avoid conflicts of interest in the assessment and collection of penalties ensuring that government officials do not personally benefit from any penalty or duties assessed or collected.

## Article 9

### ***Release and clearance of goods***

1. Each Party shall apply simple, reasonable and impartial trade and border procedures.
2. Each Party shall adopt or maintain procedures that:
  - (a) provide for advance electronic submission and processing of information before the physical arrival of goods in order to expedite their clearance;
  - (b) provide for the possibility of electronic payment for duties, taxes, fees and charges collected by customs and, as far as practicable, such charges collected by other border authorities; and
  - (c) allow for the release of goods prior to the final determination of customs duties, taxes, fees and charges, if such a determination is not done prior to, or upon arrival, or as rapidly as possible after arrival and provided that all other regulatory requirements have been met.
3. In order to avoid deterioration of perishable goods<sup>3</sup>, each Party shall provide:
  - (a) for the release of perishable goods within the shortest possible time; and
  - (b) upon request, in case of delays in the release of perishable goods, an explanation of the reasons for the delay.

## Article 10

### ***Risk management***

1. Each Party shall determine which persons, goods, or means of transport are to be examined and the extent of the examination, based on risk management.
2. Each Party shall systematically apply objective risk management procedures and practices in identifying and addressing risks related to the entry, exit, transit, transfer or end-use of goods moved between the customs territories of Parties, or to the presence of goods that are not in free circulation.
3. Each Party's border procedures and customs controls, including its documentary

<sup>3</sup> For the purposes of this Article, "perishable goods" means goods which rapidly decay due to their natural characteristics, in particular in the absence of appropriate storage conditions.

examinations, physical examinations or post-audit examinations, shall not be more onerous than necessary to limit its exposure to the risks referred to in paragraph 2.

## Article 11

### ***Formalities related to importation, exportation and transit***

1. Each Party shall limit controls, formalities, and the number of documents required in the context of trade in goods between the Parties to those necessary and appropriate to ensure compliance with its legal requirements and thereby simplify to the greatest extent possible the respective procedures.

2. With a view to minimising the incidence and complexity of import, export and transit formalities and to decreasing and simplifying import, export and transit documentation requirements, each Party shall ensure that such formalities and documentation requirements are:

- (a) applied with a view to a rapid release and clearance of goods;
- (b) applied in a manner that aims at reducing the time and cost of compliance; and
- (c) the least trade-restrictive.

3. Each Party shall use efficient import, export and transit procedures, with a view to reducing costs and unnecessary delays in trade between them, based, as appropriate, on international standards, in particular the standards, guidelines and recommendations of the United Nations Centre for Trade Facilitation and Electronic Business (UN/CEFACT), the International Organization for Standardization (ISO) and the World Customs Organization (WCO).

## Article 12

### ***Customs brokers***

No Party shall introduce the mandatory use of customs brokers. Each Party shall publish its measures on the use of customs brokers. The Parties shall apply transparent, non-discriminatory and proportionate rules if and when licensing customs brokers.

## Article 13

### ***Temporary admission of goods and inward and outward processing***

Each Party shall allow, as provided for in its domestic laws and regulations, temporary admission of goods, inward and outward processing, in accordance with international standards.

Article 14

***Competent customs offices***

1. Each Party shall designate the customs offices at which goods may be presented or cleared. In determining the competence and location of these offices and their business hours, the factors to be taken into account shall include in particular the requirements of trade.
2. Each Party shall, subject to the availability of resources, perform customs controls and procedures outside the designated business hours or outside the premises of the competent customs offices if requested by a trader for a valid reason. Any related fee or charge shall be limited to the approximate cost of the services rendered.

Article 15

***Authorised economic operator system***

A Party operating an Authorised Economic Operator System affecting international trade flows shall:

- (a) afford another Party the possibility to negotiate, through their competent authorities, a mutual recognition agreement on authorisation for the purpose of facilitating international trade while ensuring effective customs control; and
- (b) base its respective laws and regulations on relevant international standards, in particular the WCO Framework of Standards to Secure and Facilitate Global Trade (SAFE Framework).

Article 16

***Single windows for foreign trade***

Each Party shall endeavour to promote the implementation of a single window or other single-entry point which can expedite trade by enabling its traders to submit import, export or transit information electronically to the participating authorities or agencies.

Article 17

***Certification of documents***

No Party shall require certification, in particular consular transaction of commercial invoices, statements on origin or other customs documentation, including related fees and charges, in connection with the importation of any goods from another Party.

Article 18

***Confidentiality***

All information provided in relation with the importation, exportation, advance rulings or transit of goods shall be treated as confidential by the Parties in accordance with the respective domestic laws and regulations of each Party. Such information shall not be made publicly available by the authorities of a Party without the express permission of the person or authority providing it.

Article 19

***Cooperation***

1. The Parties may identify and submit to the Sub-Committee on trade in goods for consideration, additional measures with a view to facilitating trade between them.
2. The Parties shall promote international cooperation in relevant multilateral fora on trade facilitation. They shall review relevant international initiatives in order to identify, and may submit to the Joint Committee for consideration, further areas where joint action could contribute to their common objectives.

## ATTACHMENT

### NOTES TO MARITIME TRANSPORT

“Reasonable and non-discriminatory terms and conditions” means, for the purposes of multimodal transport operations, the ability of the multimodal transport operator to arrange for the conveyance of its merchandise on a timely basis, including priority over other merchandise which has entered the port at a later date.

A “Multimodal transport operator” means the person on whose behalf the bill of lading/multimodal transport document, or any other document evidencing a contract of multimodal carriage of goods, is issued and who is responsible for the carriage of goods pursuant to the contract of carriage.

(1) “Cabotage” is defined as maritime transport of goods and passengers between ports in Iceland.

(2) “Other forms of commercial presence for the supply of international maritime transport services” means the ability for international maritime transport service suppliers of the other Members to undertake locally all activities, which are necessary for the supply to their customers of a partially or fully integrated transport service, within which the maritime transport constitutes a substantial element. (This commitment shall however not be construed as limiting in any manner the commitments undertaken under the cross-border mode of delivery).

These activities include, but are not limited to:

- (a) marketing and sales of maritime transport and related services through direct contact with customers, from quotation to invoicing, these services being those operated or offered by the service supplier itself or by service suppliers with which the service seller has established standing business arrangements;
- (b) the acquisition, on their own account or on behalf of their customers (and the resale to their customers) of any transport and related services, including inward transport services by any mode, particularly inland waterways, road and rail, necessary for the supply of the integrated service;
- (c) the preparation of documentation concerning transport documents, customs documents, or other documents related to the origin and character of the goods transported;
- (d) the provision of business information by any means, including computerised information systems and electronic data interchange (subject to the provisions of the annex on telecommunications);
- (e) the setting of any business arrangements (including participation in the stock of a company) and the appointment of personnel recruited locally (or, in the case of foreign personnel, subject to the horizontal commitment on movement of personnel) with any locally established shipping agency;

(f) acting on behalf of the companies, organising the call of the ship or taking over cargoes when required.

(3) “Maritime cargo handling services” means activities exercised by stevedore companies, including terminal operators, but not including the direct activities of dockers, when this workforce is organised independently of the stevedoring or terminal operator companies. The activities covered include the organisation and supervision of:

- the loading/discharging of cargo to/from a ship;
- the lashing/unlashing of cargo;
- the reception/delivery and safekeeping of cargoes before shipment or after discharge.

(4) “Customs clearance services” (alternatively “customs house brokers’ services”) means activities consisting in carrying out on behalf of another party customs formalities concerning import, export or through transport of cargoes, whether this service is the main activity of the service provider or a usual complement of its main activity.

(5) “Container station and depot services” means activities consisting in storing containers, whether in port areas or inland, with a view to their stuffing/stripping, repairing, and making them available for shipments.

(6) “Maritime agency services” means the activities consisting in representing, within a given geographic area, as an agent the business interests of one or more shipping lines of shipping companies, for the following purposes:

- marketing and sales of maritime transport and related services, from quotation to invoicing, and issuance of bills of lading on behalf of the companies; acquisition and resale of the necessary related services, preparation of documentation, and provision of business information;
- acting on behalf of the companies organising the call of the ship or taking over cargoes when required.

(7) “Freight forwarding services” means the activity consisting of organising and monitoring shipment operations on behalf of shippers, through the acquisition of transport and related services, preparation of documentation and provision of business information.

(8) “Other supporting and auxiliary transport services” means freight brokerage services; bill auditing and freight rate information services; transportation document preparation services; packing and crating and unpacking and de-crating services; freight inspection, weighing and sampling services; and freight receiving and acceptance services (including local pick-up and delivery).

### UNDERSTANDING ON THE SCOPE OF COVERAGE OF CPC 84 – COMPUTER AND RELATED SERVICES

#### 1. CPC 84 covers all computer and related services.

(1) Technological developments have led to the increased offering of these services as a bundle or package of related services that can include some or all of the basic functions listed in paragraph 3. For example, services such as web or domain hosting, data mining services and grid computing each consist of a combination of basic computer services functions.

(2) Computer and related services, regardless of whether they are delivered via a network, including the Internet, include all services that provide any of the following or any combination thereof:

- consulting, adaptation, strategy, analysis, planning, specification, design, development, installation, implementation, integration, testing, debugging, updating, support, technical assistance, or management of or for computers or computer systems;
- consulting, strategy, analysis, planning, specification, design, development, installation, implementation, integration, testing, debugging, updating, adaptation, maintenance, support, technical assistance, management or use of or for software;<sup>6</sup>
- data processing, data storage, data hosting or database services;
- maintenance and repair services for office machinery and equipment, including computers; and
- training services for staff of clients, related to software, computers or computer systems, and not elsewhere classified.

(3) In many cases, computer and related services enable the provision of other services<sup>7</sup> by both electronic and other means. However, in such cases, there is an important distinction between the computer and related service (e.g. web-hosting or application hosting) and the other service<sup>2</sup> enabled by the computer and related service. The other service, regardless of whether it is enabled by a computer and related service, is not covered by CPC 84.

---

<sup>6</sup> The term “software” may be defined as the sets of instructions required to make computers work and communicate. A number of different programmes may be developed for specific applications (application software), and the customer may have a choice of using ready-made programmes off the shelf (packaged software), developing specific programmes for particular requirements (customized software) or using a combination of the two.

<sup>7</sup> E.g. W/120.1.A.b. (accounting, auditing and bookkeeping services), W/120.1.A.d. (architectural services), W/120.1.A.h. (medical and dental services), W/120.2.D (audiovisual services), W/120.5 (educational services).

### NOTES TO MARITIME TRANSPORT

“Reasonable and non-discriminatory terms and conditions” means, for the purposes of multimodal transport operations, the ability of the multimodal transport operator to arrange for the conveyance of its merchandise on a timely basis, including priority over other merchandise which has entered the port at a later date.

A “Multimodal transport operator” means the person on whose behalf the bill of lading/multimodal transport document, or any other document evidencing a contract of multimodal carriage of goods, is issued and who is responsible for the carriage of goods pursuant to the contract of carriage.

(1) “Domestic transport” is defined as maritime transport of goods and passengers between ports in Norway, including locations on the continental shelf where petroleum is explored or produced.

(2) “Other forms of commercial presence for the supply of international maritime transport services” means the ability for international maritime transport service suppliers of the other members to undertake locally all activities which are necessary for the supply to their customers of a partially or fully integrated transport service, within which the maritime transport constitutes a substantial element. (This commitment shall however not be construed as limiting in any manner the commitments undertaken under the cross-border mode of delivery).

These activities include, but are not limited to:

(a) marketing and sales of maritime transport and related services through direct contact with customers, from quotation to invoicing, these services being those operated or offered by the service supplier itself or by service suppliers with which the service seller has established standing business arrangements;

(b) the acquisition, on their own account or on behalf of their customers (and the resale to their customers) of any transport and related services, including inland transport services by any mode, particularly inland waterways, road and rail, necessary for the supply of the integrated service;

(c) the preparation of documentation concerning transport documents, customs documents, or other documents related to the origin and character of the goods transported;

(d) the provision of business information by any means, including computerised information systems and electronic data interchange (subject to the provisions of the Annex on telecommunications);

(e) the setting of any business arrangements (including participation in the stock of a company) and the appointment of personnel recruited locally (or, in the case of foreign personnel, subject to the horizontal commitment on movement of personnel) with any locally established shipping agency;

(f) acting on behalf of the companies, organising the call of the ship or taking

over cargoes when required.

(3) “Maritime cargo handling services” means activities exercised by stevedore companies, including terminal operators, but not including the direct activities of dockers, when this workforce is organised independently of the stevedoring or terminal operator companies. The activities covered include the organisation and supervision of:

- the loading/discharging of cargo to/from a ship;
- the lashing/unlashing of cargo;
- the reception/delivery and safekeeping of cargoes before shipment or after discharge.

(4) “Customs clearance services” (alternatively “customs house brokers’ services”) means activities consisting in carrying out on behalf of another party customs formalities concerning import, export or through transport of cargoes, whether this service is the main activity of the service provider or a usual complement of its main activity.

(5) “Container station and depot services” means activities consisting in storing containers, whether in a port area or inland, with a view to their stuffing/stripping, repairing, and making them available for shipments.

(6) “Maritime agency services” means the activities consisting in representing, within a given geographic area, as an agent the business interests of one or more shipping lines or shipping companies, for the following purposes:

- marketing and sales of maritime transport and related services, from quotation to invoicing, and issuance of bills of lading on behalf of the companies; acquisition and resale of the necessary related services, preparation of documentation, and provision of business information;
- acting on behalf of the companies organising the call of the ship or taking over cargoes when required.

(7) “Freight forwarding services” means the activity consisting of organising and monitoring shipment operations on behalf of shippers, through the acquisition of transport and related services, preparation of documentation and provision of business information.

(8) “Other supporting and auxiliary transport services” means freight brokerage services; bill auditing and freight rate information services; transportation document preparation services; packing and crating and unpacking and de-crating services; freight inspection, weighing and sampling services; and freight receiving and acceptance services (including local pick-up and delivery).

<b>PART I.      HORIZONTAL COMMITMENTS (for financial services)</b>			
<p>1. The conditions affecting all the services sectors as specified in horizontal commitments and Appendix 1 of Annex VIII (Chile – Schedule of Specific Commitments) apply to this Schedule except for the specific provisions of this Annex.</p> <p>2. The Chilean financial services sector is partially compartmentalised, that is to say the institutions, domestic and foreign, authorised to operate as banks may not participate directly in the insurance and securities business and <i>vice versa</i>. However, subject to authorisation from the Financial Market Commission (“<i>Comision para el Mercado Financiero</i>”, CMF), domestic and foreign banks operating in Chile may set up subsidiaries, with their own and separate capital, to supply other financial services in addition to their main line of business. The main business of banks is accepting or receiving money from the public on a regular basis and granting money credits represented by securities or commercial paper or any other credit instrument.</p> <p>3. The subsectors and services included in this Schedule are defined in accordance with the relevant Chilean legislation.</p> <p>4. Chile reserves the right to adopt measures to regulate financial conglomerates, including the entities forming part of it.</p> <p>5. Chile may restrict or prescribe on a non-discriminatory basis a specific type of legal entity, including subsidiaries, branches, representative offices or any other form of commercial presence that must be adopted by entities operating in all financial services subsectors.</p> <p>6. None of Chile’s commitments apply to the social security system, including the Institute for Pension Normalisation (“<i>Instituto de Normalización Previsional</i>”, INP) under Law 18.689, the pension funds under Decree Law 3500, the Social Security Health Institutions (“<i>Instituciones de Salud Previsional</i>”, ISAPRES) under Law 18.933, the National Health Fund (“<i>Fondo Nacional de Salud</i>”, FONASA) under Law 18.469, the Non-Profit Social Security Benefits Administrators (“<i>Cajas de Compensación</i>”) under Law 18.833, Law</p>

<p>16.744 on work accidents, unemployment insurance under Law 19.728, and amendments to those laws, and whether those services are provided by the institutions created by law for those purposes or other financial institutions through which financial services related to the social security system are provided or could be provided.</p> <p>7. The commitments do not require Chile to permit cross-border financial service suppliers of another Party to do business or solicit in its territory. Chile may define “doing business” and “solicitation” for the purpose of this commitment provided that those definitions are not inconsistent with its commitments.</p> <p>8. Without prejudice to other means of prudential regulation of cross-border trade in financial services, Chile may require the registration or authorisation of a cross-border financial service supplier of another Party and of financial instruments.</p> <p>9. The purchase of financial services, by persons located in the territory of Chile and its nationals wherever located, from financial services suppliers of another Party shall be subject to the foreign exchange regulations adopted or maintained by the Central Bank of Chile (“<i>Banco Central de Chile</i>”) in accordance with its Organic Law (Ley 18.840).</p> <p>10. Chile reserves the right to adopt or maintain any measure with respect to the provision of public law enforcement and correctional services, and the following services, to the extent that they are social services established or maintained for reasons of public interest: income security or insurance, social security or insurance, social welfare, public education, public training, health care and childcare.</p> <p>11. In the transfer or disposal of any interest in stock or asset held in an existing state enterprise or governmental entity, Chile reserves the right to prohibit or impose limitations on the ownership of said interest or asset, and on the right of foreign investors or their investment to control any State company created thereby or investments made by the same. In connection with any such transfer or disposal, Chile may adopt or maintain any measure related to the nationality of senior management and member of the Board of Directors. A State company shall mean any company owned or controlled by Chile by means of an interest share in the ownership thereof, and it shall include any company created after the effective date of this Agreement for the sole purpose of selling or disposing of its interest share in the capital or assets of an existing state enterprise governmental entity.</p> <p>12. The term “CPC” means the Provisional Central Product Classification (Statistical paper Series M, No. 77, Department of International Economic and Social Affairs, Statistical Office of the United Nations, New York, (1991)).</p> <p>13. Movement of natural persons (Mode 4): Unbound, except for transfers of natural persons within a foreign enterprise established in Chile, in accordance to commercial presence, of senior and specialised personnel who have been employed by the organisation for a period of one year uninterruptedly, within the three years immediately before the date on which the application was filed, and who perform the same type of duties in the parent company of their country of origin. In any case, Chilean natural persons or foreigners with more than five years of residence in Chile may not represent less than 85% of the total staff employed in Chile, when the employer hires more than 25 persons.</p> <p>Senior personnel are those executives who come under the direct supervision of the board of directors of the enterprise established in Chile and who, <i>inter alia</i>:</p> <ul style="list-style-type: none"> <li>- conduct the management of the organisation or one of its departments or subdivisions;</li> <li>- supervise and control the work of other supervisory, professional or managerial employees;</li> <li>- are personally authorised to hire and fire or recommend hiring or firing or any other measure related to personnel.</li> </ul>

For all legal purposes, senior and specialised personnel must establish domicile or residence in Chile. Personnel admitted under these conditions will be subject to the provisions of the labour and social security legislation in force.</p> <p>Length of stay for a period of up to two years which may be extended on a reciprocity basis, provided the conditions on which it is based remain in effect, without requiring that business person to apply for permanent residence. The length of stay for family dependents, including extensions, shall be the same as that of the businessperson they are accompanying. Senior and specialised personnel and their family dependents may freely enter and leave Chile without having to apply for separate re-entry permissions for the duration of their visas, on the basis of reciprocity. A family dependent (spouse, parent or offspring) will be granted a visa as a dependent but will not be allowed to undertake remunerated activities. Nevertheless, a family dependent may be permitted to perform a remunerated activity in Chile, upon a separate application under this Agreement or the general immigration rules, for their own visa as non-dependent. The application can be submitted and processed in Chile.</p> <p>The temporary presence of natural persons includes also the following categories:</p> <p>a) Persons not residing in the territory of Chile who are representatives of a financial service supplier and are seeking temporary entry for the purpose of negotiating for the sale of financial services or entering into agreements to sell financial services for that service provider, where those representatives will not be engaged in making direct sales to the general public or in supplying financial services themselves.</p> <p>b) Persons working in a senior position, as defined above, within a legal person, who are responsible for setting up in Chile a commercial presence of a financial service provider of an EFTA State when:</p> <ul style="list-style-type: none"> <li>- the representatives are not engaged in making direct sale or supplying services; and</li> <li>- the service provider has its principal place of business in the Area of an EFTA State and has no other representative, office, branch or subsidiary in Chile.</li> </ul> <p>Length of stay for a period of up to 90 days, which may be extended.</p> <p>For all legal purposes, persons not residing in the territory of Chile will be subject to the provisions of labour and social security legislation in force.</p>

<b><u>B) INSURANCE AND INSURANCE- RELATED SERVICES</u></b>			
<p>1. In Chile, the insurance business is divided into two groups: the first group comprises companies that insure property or patrimony (“<i>patrimonio</i>”) against the risk of loss or damage, while the second comprises those that cover personal risks or guarantee, within or at the end of a certain term, a capital sum, a paid-up policy or an income for the insured or his beneficiaries. The same insurance company may not be constituted in such a way as to cover both categories of risk.</p> <p>2. Credit insurance companies, even though classified in the first group, must be constituted as legal entities with the sole purpose of covering this type of risk, i.e. loss of or damage to the patrimony of the insured as a result of the non-payment of a money debt or loan, being also permitted to cover guarantee and fidelity risks.</p> <p>3. Insurance corporations can be legally constituted only in accordance with the provisions of the ‘Law on corporations (“<i>ley sobre sociedades anónimas</i>”)’. Branches of foreign companies that may operate in the Chilean insurance sector should be established in Chile as a ‘foreign corporation agency (“<i>agencia de sociedad anónima extranjera</i>”)’ authorised for such purposes.</p> <p>4. Insurance may be taken out directly or through registered insurance brokers who, to engage in that activity, must be enrolled in the registry.</p> <p>5. The Chilean insurance schedule does not include insurance related to the social security system.</p> <p>6. All types of insurance that Chilean law makes or may make compulsory, and all insurance related to social security, cannot be contracted outside Chile. This reservation does not apply in the event that Chilean law makes compulsory insurance for international maritime transport, international commercial aviation, space launching and freight (including satellites) and goods in international transit (includes goods transported). This exclusion does not apply to insurance for cabotage or related activities.</p>

2. Where a Party recognises, by agreement or arrangement, prudential measures of a non-Party in determining how the Party’s measures relating to financial services shall be applied, that Party shall afford adequate opportunity for another Party to negotiate its accession to such an agreement or arrangement, or to negotiate a comparable agreement or arrangement with it, under circumstances in which there would be equivalent regulation, oversight, implementation of such regulation and, if appropriate, procedures concerning the sharing of information between the parties to the agreement or arrangement. Where a Party accords such recognition autonomously, it shall afford adequate opportunity for another Party to demonstrate that such circumstances exist.

2. In addition to the protection provided for in paragraph 1 and in the international agreements to which the Parties are parties or which the Parties shall ratify or accede to pursuant to paragraph 2 of Article 2 (International conventions), each Party shall grant and ensure protection to audiovisual producers for their videograms or cinematographic works:

- (a) by applying Articles 11, 12, 13 and 14 of the WPPT, mutatis mutandis; or
- (b) by conferring instead an author's right to a cinematographic work to the person who took the initiative and the responsibility to realise it.

3. The Parties shall ensure that a broadcasting organisation has at least the exclusive right of authorising the fixation and the reproduction of their broadcasts. The Parties shall ensure broadcasting organisations have at least the right to receive a remuneration for acts of wireless retransmission or its communication to the public, in establishments accessible to the general public.

4. With regard to the protection of visual and audiovisual performances, phonograms, and broadcasts, the Parties may, in their domestic laws and regulations, provide for the same limitations or exceptions as they provide for in their domestic laws and regulations in connection with the protection of literary and artistic works.

5. The term of protection to be granted to performers under the Agreement shall last at least until the end of a period of 50 years computed from the end of the year in which the performance was fixed.<sup>2</sup>

6. The term of protection to be granted under the Agreement to audiovisual producers for their videograms or cinematographic works shall last at least:

---

<sup>2</sup> Protection begins with the performance, with the publication of the phonogram or audiovisual fixation, or with its fixation if it is not published. The term of protection is calculated from the end of the year in which the event determining the calculation occurred.

- (a) when applying Articles 11, 12, 13 and 14 of the WPPT *mutatis mutandis*, 50 years from the end of the year in which the videogram was published, or failing such publication within 50 years from fixation of the videogram, 50 years from the end of the year in which the fixation was made;

#### Article 4

##### ***Trademarks***

1. The Parties shall grant adequate and effective protection of trademarks for goods and services. Any sign, or any combination of signs, capable of distinguishing the goods or services of one undertaking from those of other undertakings, shall be capable of constituting a trademark. Such signs, in particular words including combinations of words, personal names, letters, numerals, figurative elements, shapes of goods, sounds and combinations of colours as well as any combination of such signs, shall be eligible for registration as trademarks. Where signs are not inherently capable of distinguishing the relevant goods or services, the Parties may make registrability depend on distinctiveness acquired through use. The Parties may require, as a condition of registration, that trademarks are capable of being represented on the register in a manner which enables the competent authorities and the public to determine the clear and precise subject matter of the protection afforded to its proprietor.

2. The Parties shall grant the owner of a registered trademark the exclusive right to prevent all third parties not having the owner's consent from using in the course of trade identical or similar signs for goods or services which are identical or similar to those in respect of which the trademark is registered where such use would result in a likelihood of confusion. In case of the use of an identical sign for identical goods or services, a likelihood of confusion shall be presumed. The rights described above shall not prejudice any existing prior rights, nor shall they affect the possibility of Parties making rights available on the basis of use.

3. Protection according to paragraph 2 shall not be limited to identical or similar goods or services where the trademark, whether registered or not, is well-known in the relevant country, provided that the use of the conflicting mark would indicate a connection between those goods or services and the owner of the well-known mark, and that the interests of the owner of the well-known mark would likely be damaged by such use. Cases of likelihood of damage may include situations such as where the use of the trademark without due cause would be detrimental to the distinctive character, or take unfair advantage, or be detrimental to the repute of the well-known mark.

4. No Party may require as a condition for determining that a trademark is well-known that the trademark has been registered in that Party or in another jurisdiction, included on a list of well-known trademarks, or given prior recognition as a well-known trademark.

5. The Parties reaffirm the importance of, and shall be guided by the principles contained in, the WIPO Joint Recommendation Concerning Provisions on the Protection of Well-Known Marks, adopted by the Assembly of the Paris Union for the Protection of Industrial Property and the General Assembly of the WIPO in 1999, and the WIPO Joint Recommendation Concerning Provisions on the Protection of Marks and other Industrial Property Rights in Signs, on the Internet, adopted by the Assembly of the Paris Union for the Protection of Industrial Property and the General Assembly of the WIPO in 2001.

## Article 5

### *Patents*

1. The Parties shall at least ensure in their domestic laws and regulations that patents are available for any inventions, whether products or processes, in all fields of technology, provided that they are new, involve an inventive step and are capable of industrial application. Subject to paragraphs 2 and 3, patents shall be available and patent rights enjoyable without discrimination as to the place of invention, the field of technology and whether products are imported or locally produced. In line with TRIPS Agreement article 27(1), importation and offering on the market of a product shall be deemed to be “working of the patent” in the country of importation.

2. The Parties may exclude from patentability inventions, the prevention within their territory of the commercial exploitation of which is necessary to protect *ordre public* or morality, including to protect human, animal or plant life or health or to avoid serious prejudice to the environment, provided that such exclusion is not made merely because the exploitation is prohibited by their domestic laws and regulations.

3. Each Party may also exclude from patentability:

- (a) any invention of methods for treatment of the human or animal body by surgery or therapy or for diagnostic methods practised on the human or animal body; this paragraph shall not apply to products, in particular substances or compositions, for use in any of these methods; and
- (b) plants and animals other than micro-organisms, and essentially biological processes for the production of plants or animals other than non-biological and microbiological processes.

4. The Parties shall provide a patent applicant with opportunities to make amendments, corrections, and observations in connection with its application.

5. Recognising the benefits of transparency in the patent system, the Parties shall endeavour to publish unpublished pending patent applications promptly after the

expiration of 18 months from the filing date or, if priority is claimed, from the priority date.

6. If a pending application is not published promptly in accordance with paragraph 5, the Parties shall publish such application or the corresponding patent as soon as practicable.

7. The Parties shall provide that an applicant may request the early publication of an application prior to the expiration of the period mentioned in paragraph 5.

8. Each Party shall adopt or maintain an exception for patents related to acts necessary for obtaining marketing authorisation or sanitary permit for a pharmaceutical product (regulatory review exception). The exception shall not unreasonably conflict with a normal exploitation of the patent and shall not unreasonably prejudice the legitimate interests of the patent owner, taking into account the legitimate interest of third parties.

9. Each Party shall make available an extension of the patent term to compensate the patent owner for unreasonable curtailment of the patent term as a result of the marketing approval or sanitary permit process.

10. Compulsory licensing of patents shall only be granted under the terms of the TRIPS Agreement and the Doha Declaration.

#### Article 6

##### ***Undisclosed information***

1. Each Party, when requiring, as a condition for granting the marketing approval or sanitary permit of pharmaceutical or agricultural chemical products which utilise new chemical entities, the submission of undisclosed test or other data, the origination of which involves a considerable effort, shall protect such data against unfair commercial use. In addition, each Party shall protect such data against disclosure, except where necessary to protect the public, or unless steps are taken to ensure that the data are protected against unfair commercial use.

2. No Party shall permit third persons not having the consent of the person providing the information to market a product based on this new chemical entity, on the basis of the approval granted to the person submitting such information for a period of at least five years from the date of approval for a pharmaceutical product and ten years from the date of approval for an agricultural chemical product<sup>3</sup>.

#### Article 7

##### ***Industrial designs***

---

<sup>3</sup> It is understood that the Parties may, in cases where the products for which the marketing approval or sanitary permit is requested were produced by the submitter of the undisclosed data or with his consent, allow the applicant to rely on that data.

The Parties shall ensure, in their domestic laws and regulations, adequate and effective protection of industrial designs by providing in particular a period of protection of at least 15 years in total. The Parties may provide for a shorter period of protection for designs of component parts used for the purpose of the repair of a product.

## Article 8

### ***Geographical indications***

1. The Parties shall ensure, in their domestic laws and regulations, adequate and effective means to protect geographical indications with regard to all goods.
2. For the purposes of this Annex, “geographical indications”, including appellations of origin as defined in the domestic laws and regulations of the Parties, mean indications which identify a good as originating in the territory of a Party, or a region or locality in that territory, where a given quality, reputation or other characteristic of the good is essentially attributable to its geographical origin.
3. Without prejudice to Article 23 of the TRIPS Agreement, the Parties shall provide legal means for interested parties to prevent the use of a geographical indication for goods not originating in the place indicated by the designation in question in a manner which misleads the public as to the geographical origin of those goods or which constitutes an act of unfair competition within the meaning of Article 10*bis* of the Paris Convention.
4. The Parties shall provide legal means for interested parties to oppose the registration or to request the invalidation of a trademark which contains or consists of a geographical indication of a Party with respect to goods not originating in the territory indicated, if such use misleads the public as to the true place of origin of the goods.
5. The Parties shall provide legal means for interested parties to prevent the use of a geographical indication for agricultural products and foodstuffs for goods of the same type not originating in the place indicated by the designation in question.
6. Without prejudice to this Article, Appendix (Geographical Indications) applies to the mutual recognition and protection of geographical indications of Liechtenstein, Switzerland and Chile.

## Article 9

### ***Country names, indications of source, state emblems and flags***

1. The Parties shall provide the legal means for interested parties to prevent commercial use of country names of the Parties in a manner which misleads consumers as to the origin of such goods or services.
2. Indications of source shall be understood in accordance with the Paris Convention. The Parties shall provide appropriate legal means for interested parties to

prevent the use of false indications of source for goods or services, which constitutes an act of unfair competition within the meaning of Article 10*bis* of the Paris Convention.

3. The Parties shall, in accordance with their obligations under Article 6*ter* of the Paris Convention, refuse or invalidate the registration and prohibit by appropriate measures the use, without authorisation by the competent authorities, of armorial bearings, flags and other State emblems of a Party as trademarks or elements of trademarks.

**SECTION III**

**ACQUISITION AND MAINTENANCE OF INTELLECTUAL PROPERTY  
RIGHTS**

Article 10

*Acquisition and maintenance*

Where the acquisition of an intellectual property right is subject to the right being granted or registered, the Parties shall ensure that the procedures for granting or registration are at least the same level as that provided in the TRIPS Agreement, in particular in its Article 62.

## SECTION IV

### ENFORCEMENT OF INTELLECTUAL PROPERTY RIGHTS

#### Article 11

##### *General principles*

The Parties shall provide in their domestic laws and regulations for enforcement provisions for rights covered by Article 1 (Definition of intellectual property) that shall at least be the same level as provided for in the TRIPS Agreement, in particular in its Articles 41 to 61.

#### Article 12

##### *Suspension of release*

1. The Parties shall adopt procedures to enable a right holder, who has valid grounds for suspecting that importation or exportation of goods infringing intellectual property rights may take place, to lodge an application in writing with the competent authorities, administrative or judicial, for the suspension by the customs authorities of the release of such goods.
2. The Parties shall enable customs authorities to act upon their own initiative and suspend the release of goods when they have valid grounds for suspecting that importation or exportation of those goods would infringe intellectual property rights, at least in the case of trademarks and copyrights. Customs authorities shall use risk analysis to identify goods suspected of infringing intellectual property rights, at least in the case of trademarks and copyrights.
3. The customs authorities of each Party shall either adopt procedures under which a right holder can record intellectual property rights with the customs authorities or maintain a regular dialogue and promote cooperation with relevant stakeholders and other authorities involved in the enforcement of intellectual property rights.
4. The competent authorities shall, in accordance with domestic procedures, suspend the release of the goods suspected of infringing intellectual property rights for which an application was filed as per the procedure under paragraph 1 or covered under paragraph 2.
5. The Parties shall authorise their customs authorities to inform the right holder in order to enable the lodging of an application according to paragraph 1.
6. It is understood that there shall be no obligation to apply procedures set forth in paragraphs 1 and 2 to the suspension of the release of goods put on the market by or with the consent of the right holder.

7. In case of suspension pursuant to paragraphs 1 and 2 with respect to importation into or exportation from the customs territory of a Party, the competent authorities of the Party suspending the release of the goods shall notify the right holder of the suspension including necessary information to enforce his or her rights, such as the name and addresses of the consignor or consignee, and the importer or exporter, as applicable, and the quantity of the goods in question.

8. Each Party shall ensure that the competent administrative or judicial authorities, upon request by the right holder, have the authority to decide that the products, the release of which has been suspended pursuant to paragraphs 1 or 2, shall be held seized until a final decision is reached in the infringement dispute.

9. Each Party shall provide that if the competent authorities have made a determination that the suspected goods infringe an intellectual property right, procedures are made available to enable the right holder to seek recovery of, and indemnify against, costs and expenses that the right holder may have incurred in connection with the exercise of rights and remedies provided in this Article.

10. Each Party may exclude from the application of the above provisions small quantities of goods of a non-commercial nature contained in travellers' personal luggage or sent in small consignments.<sup>4</sup>

### Article 13

#### ***Right of inspection***

1. The Parties shall ensure that the competent authorities provide the applicant for the suspension of goods referred to in Article 12 (Suspension of release) and other persons involved<sup>5</sup> in the suspension the opportunity to inspect goods whose release has been suspended.

2. When examining goods, the competent authorities may take samples and shall grant the right holder access to such samples for the purposes of analysis and of facilitating the subsequent procedure.

3. The declarant, holder or owner of the suspected infringing goods may, in accordance with the domestic laws and regulations of the Party concerned, be present at the inspection with a view to protecting its trade secret.

### Article 14

#### ***Provisional measures and injunctions***

---

<sup>4</sup> If small consignments are excluded from the application of the above provisions, they shall only be so to the extent that they do not amount to import or export on a commercial scale.

<sup>5</sup> The term 'other persons involved' shall be interpreted in accordance with the domestic laws and regulations of the Parties.

1. Each Party shall ensure that its judicial authorities have the authority to order prompt and effective provisional measures:

- (a) to prevent infringements of intellectual property rights from occurring, and in particular to prevent the entry of goods into channels of commerce in their jurisdiction, including imported goods immediately after customs clearance; and
- (b) to preserve relevant evidence with regard to the alleged infringement.

2. The Parties' judicial authorities shall have the authority to adopt provisional measures *inaudita altera parte* where appropriate, in particular where delay is likely to cause irreparable harm to the right holder, or where there is a demonstrable risk of evidence being destroyed. Upon request for provisional measures, the Parties' judicial authorities shall act expeditiously and take a decision without undue delay.

3. Each Party shall ensure that, in civil judicial proceedings with regard to the enforcement of intellectual property rights, its judicial authorities have the authority to order a party to the proceedings to desist from an infringement, *inter alia*, to prevent the entry into the channels of commerce in their jurisdiction of imported goods that involve the infringement of an intellectual property right, immediately after customs clearance of such goods.

#### Article 15

##### ***Removal from commerce***

The Parties shall ensure that the competent judicial authorities in an infringement dispute may order, upon request of the right holder, that appropriate measures be taken with regard to goods that they have found to be infringing an intellectual property right and, in appropriate cases, with regard to materials and implements predominantly or directly used in the creation or manufacture of those goods. Such measures shall include definitive removal from the channels of commerce or destruction. In considering a request for corrective measures, the need for proportionality between the seriousness of the infringement and the remedies ordered as well as the interests of third parties shall be taken into account.

#### Article 16

##### ***Civil remedies***

1. Each Party shall make available to right holders civil judicial procedures concerning the enforcement of any intellectual property right covered in this Annex.

2. Each Party shall ensure that:

- (a) in civil judicial proceedings, its judicial authorities have the authority to order the infringer, who knowingly or with reasonable grounds to know engaged in infringing activity of intellectual property rights, to pay the right holder damages adequate to compensate for the actual injury the right holder has suffered as a result of the infringement; and
- (b) in determining the amount of damages for intellectual property rights infringement, its judicial authorities shall consider, *inter alia*, the actual damage, lost profits, any profits made by the infringer or establishing a fair licence fee.

3. At least in cases of copyright or related right infringement and trademark counterfeiting, each Party shall provide that its judicial authorities have the authority to order the infringer to pay the right holder the infringer's profits that are attributable to the infringement.

#### Article 17

##### ***Criminal remedies***

The Parties shall provide for criminal procedures and penalties for wilful intellectual property rights infringements on a commercial scale.

#### Article 18

##### ***Security or equivalent assurance, liability declaration***

In the context of Articles 12 (Suspension of release) and 14 (Provisional measures and injunctions), the Parties shall ensure that their competent authorities have the authority to require an applicant, in justified cases, to provide a security or equivalent assurance, sufficient to protect the defendant and the competent authorities and to prevent abuse. Such security or equivalent assurance shall not unreasonably deter recourse to these procedures. The Parties may fulfil this obligation by requiring an applicant to declare to accept liability towards the persons involved, instead of providing a security or equivalent assurance.

#### Article 19

##### ***Final judicial and administrative decisions***

The Parties shall ensure that final judicial and administrative decisions relating to intellectual property rights are:

- (a) in writing and contain the findings of fact and the reasoning or the legal basis on which the decisions are based; and

- (b) published or otherwise made publicly available in a national language in such a manner as to enable interested parties to become acquainted with them, subject to protection of confidential information.

Article 20

***Cooperation in the field of intellectual property***

The Parties, recognising the growing importance of intellectual property rights as a factor of social, economic and cultural development, agree to enhance cooperation in the field of intellectual property.

# **APPENDIX**

REFERRED TO IN ARTICLE 8 OF ANNEX XII

GEOGRAPHICAL INDICATIONS

APPENDIX TO ANNEX XII  
GEOGRAPHICAL INDICATIONS

Article 1

***Scope of Protection***

1. The geographical indications of the Parties listed in Attachments I and II shall be protected against:

- (a) any commercial use with respect to goods of the same type as those to which the geographical indication applies that does not comply with the requirements set according to the domestic laws and regulations of the Party to which the geographical indication refers; and
- (b) any use which constitutes an act of unfair competition within the meaning of Article 10*bis* of the Paris Convention for the Protection of Industrial Property (1967), including any use that would indicate or suggest a connection between those goods or services and the beneficiaries of the geographical indication, and would be likely to damage their interests, or, where applicable, because of the reputation of the geographical indication in the Party concerned, such use would be likely to impair or dilute in an unfair manner, or take unfair advantage of, that reputation.

2. Protection according to paragraph 1 shall also be granted if the protected indication is used in translation, to the extent that such use would result in a likelihood of confusion for the relevant public<sup>1</sup>. If a translation of a multicomponent geographical indication contains within it a term that is customary in common language as the common name for the product to which the geographical indication refers in the territory of the Party where protection is sought, the provisions of this Appendix shall not prejudice the right of any person to use the term customary in common language in association with the product to which the geographical indication refers.

3. The protection provided under this Appendix shall not apply to an individual component of a multicomponent geographical indication contained in Attachment I or II, if the individual component is a term that is customary in common language as the common name for the product to which the geographical indication refers, provided the term is not used with the purpose of misleading the public with respect to a protected geographical indication.

4. The provisions of this Appendix shall not prevent the use of a name of a plant variety or an animal breed, provided that such use does not mislead consumers as to the true origin of the good or constitute an act of unfair competition regarding the geographical indication.

---

<sup>1</sup> Likelihood of confusion shall not be required for the protection of single term Geographical Indications used in translation.

5. Once a geographical indication is protected under this Appendix, the use of such protected name shall not be subject to any registration of users, or further charges.
6. The registration of trademarks infringing paragraphs 1 and 2 shall be refused or invalidated at the request of an interested party, or *ex officio* if the domestic laws and regulations of the Parties permit.
7. The Parties shall protect geographical indications also where a prior trademark exists. The Parties shall have no obligation to protect an indication referred to in Attachments I or II where in the light of a reputed or well-known trademark, protection is liable to mislead consumers as to the true identity of the good or service.
8. Where a prior trademark has been applied for or registered in good faith before the entry into force of the Agreement, it may continue to be used and renewed notwithstanding the protection and the use of the geographical indication under this Appendix, provided that no other grounds for the invalidity of the trademark or its revocation exist as specified by the domestic laws and regulations of the Party concerned. A Party may provide that such a trademark may be subject to variations that may require the filing of new trademark applications, provided that these variations are not undermining the protection of geographical indications and there are no grounds for invalidation of the trademark under the Parties' domestic laws and regulations.
9. The geographical indications listed in Attachments I and II shall not become generic in the territory of the Parties.
10. There shall be no obligation under this Appendix to protect geographical indications, which are not or cease to be protected in their territory of origin.

## Article 2

### ***Enforcement***

1. Each Party shall provide for enforcement through administrative action for the protection provided for in Article 1 (Scope of protection), to the extent provided for by its domestic laws and regulations and at the request of an interested party.<sup>2</sup> Additional administrative or judicial steps to prevent or stop the unlawful use of protected geographical indications may also be provided by the Parties, within their domestic laws, regulations and practice.
2. This Article applies without prejudice to Section IV (Enforcement of Intellectual Property Rights) of Annex XII (Protection of Intellectual Property).

---

<sup>2</sup> For the purposes of this Appendix, natural and juridical persons such as producers and their institutions, associations and organisations in any legal form, providers of services, traders or consumers, as well as state authorities shall be deemed to be interested parties, provided that they have a legitimate interest and that their residence, head office or domicile is located in a Party.

Article 3

***Modification to the lists of geographical indications***

1. A Party intending to add, remove or modify geographical indications in Attachments I or II shall notify the other Parties in writing. Within 90 days from the receipt of such written notification, the Parties shall enter into consultations with the aim of finding an agreement on the proposed modifications, which shall be submitted to the Joint Committee to amend the relevant Attachment.
2. For new geographical indications to be added, nothing shall require a Party to protect a geographical indication which is identical to the term customary in common language as the common name for the product to which the geographical indication refers in the territory of that Party.

Article 4

***Transitional period***

1. Goods identified with a geographical indication listed in Attachments I or II which, at the time of entry into force of the Agreement, have been legally produced, designated and presented, but which, according to this Appendix, shall not be identified with such an indication, may be marketed by wholesalers or producers for one year from the entry into force of the Agreement and by retailers of goods until stocks are exhausted.
2. Unless otherwise agreed by the Parties, goods whose description, presentation or packaging cease to conform to this Appendix following an amendment thereto, may continue to be marketed until stocks are exhausted.

2. Subject to the requirement that such measures are not applied in a manner that would constitute a means of arbitrary or unjustifiable discrimination between the Parties where the same conditions prevail or a disguised restriction on trade between the Parties, nothing in this Chapter shall be construed to prevent a Party from imposing or enforcing measures:

- (a) necessary to protect public morals, order or safety;
- (b) necessary to protect human, animal or plant life or health;

- (a) treat a locally established supplier less favourably than another locally established supplier on the basis of degree of foreign affiliation or ownership;

These measures may include procedures to render ineligible for participation in the Party's procurements, either indefinitely or for a stated period, suppliers that that Party has determined to have engaged in fraudulent or other illegal actions in relation to government procurement in a Party's territory. Each Party shall also ensure that it has policies and procedures in place to eliminate, to the extent possible, or manage any potential conflict of interest on the part of those involved in or having influence over a procurement.

ARTICLE 77

***Rules of origin***

For purposes of covered procurement, each Party shall apply rules of origin to goods that it applies in the normal course of trade to imports of the same goods.

Such medium shall be widely disseminated, and the notice shall remain accessible, at least until expiration of the time period indicated in the notice. The notice shall:

A procuring entity covered under Appendix 2 or 3 to Annex XIII (Government Procurement) may use a notice of planned procurement as a notice of intended procurement provided that the notice of planned procurement includes as much of the information referred to in paragraph 3 as is available to the entity and a statement that interested suppliers should express their interest in the procurement to the procuring entity.

## ARTICLE 81

### *Conditions for participation*

1. In establishing the conditions for participation and assessing whether a supplier satisfies such conditions, a Party, including its procuring entities:

- (a) shall limit any conditions for participation in a procurement to those that are essential to ensure that a supplier has the legal and financial capacities and the commercial and technical abilities to undertake the relevant procurement;

- (b) shall evaluate the financial capacity and the commercial and technical abilities of a supplier on the basis of that supplier's business activities both inside and outside the territory of the Party of the procuring entity;
- (c) shall base its evaluation solely on the conditions that the procuring entity has specified in advance in notices or tender documentation;
- (d) shall not impose the condition that, in order for a supplier to participate in a procurement, the supplier has previously been awarded one or more contracts by a procuring entity of a Party; and
- (e) may require relevant prior experience where essential to meet the requirements of the procurement.

2. Where there is supporting evidence, and provided that this is not applied in a manner that would constitute a means of arbitrary or unjustifiable discrimination between the Parties, a Party, including its procuring entities, may exclude a supplier on grounds such as:

- (a) bankruptcy or insolvency;
- (b) false declarations;
- (c) significant or persistent deficiencies in performance of any substantive requirement or obligation under a prior contract or contracts;

1. A Party, including its procuring entities, may maintain a supplier registration system under which interested suppliers are required to register and provide certain information.

3. A procuring entity shall promptly inform any supplier that submits a request for participation in a procurement of its decision with respect to that request. Where an entity rejects a supplier's request for participation or ceases to recognise a supplier as qualified, that entity shall, upon request of the supplier, promptly provide the supplier with a written explanation of the reasons for its decision.

4. Where a procuring entity intends to use selective tendering, it shall allow all qualified suppliers to participate in a particular procurement, unless the procuring entity states in the notice of intended procurement any limitation on the number of suppliers that will be permitted to tender and the criteria for selecting the limited number of suppliers.

## ARTICLE 83

### *Multi-use lists*

1. A procuring entity may maintain a multi-use list of suppliers, provided that a notice inviting interested suppliers to apply for inclusion on the list is published annually in the appropriate medium listed in Appendix 8 to Annex XIII (Government Procurement), and where published by electronic means, made available continuously in the electronic medium listed in Appendix 8 to Annex XIII (Government Procurement). Where a multi-use list will be valid for three years or less, a procuring entity may publish the notice only once, at the beginning of the period of validity of the list.

2. The notice referred to in paragraph 1 shall include the information specified in Appendix 11 to Annex XIII (Government Procurement).

3. A procuring entity shall allow suppliers to apply at any time for inclusion on a multi-use list and shall include on the list all qualified suppliers within a reasonably short time. ## ARTICLE 84

### *Tender documentation*

Unless already provided for in the notice of intended procurement, such documentation shall include a complete description of the information specified in Appendix 11 to Annex XIII (Government Procurement).

2. Where a procuring entity does not offer free direct access to the entire tender documents and any supporting documents by electronic means, that procuring entity shall make promptly available the tender documentation at the request of any interested supplier of the Parties. The procuring entity shall also promptly reply to any reasonable request for relevant information by any interested or participating supplier, provided that such information does not give that supplier an advantage over other suppliers.

ARTICLE 85

*Technical specifications*

1. A procuring entity shall not prepare, adopt or apply any technical specification or prescribe any conformity assessment procedure with the purpose or the effect of creating unnecessary obstacles to trade between the Parties.
2. In prescribing the technical specifications for the goods or services being procured, a procuring entity shall, where appropriate:
  - (a) set out the technical specification in terms of performance and functional requirements, rather than design or descriptive characteristics; and
  - (b) base the technical specification on international standards where such exist or otherwise, on national technical regulations, recognised national standards or building codes.
3. Where design or descriptive characteristics are used in the technical specifications, a procuring entity should indicate, where appropriate, that it will consider tenders of equivalent goods or services that demonstrably fulfil the requirements of the procurement by including words such as “or equivalent” in the tender documentation.
4. A procuring entity shall not prescribe any technical specifications that require or refer to a particular trademark or trade name, patent, copyright, design or type, specific origin, producer or supplier, unless there is no other sufficiently precise or intelligible way of describing the procurement requirements and provided that, in such cases, the entity includes words such as “or equivalent” in the tender documentation.
5. A procuring entity shall not seek or accept, in a manner that would have the effect of precluding competition, advice that may be used in the preparation or adoption of any technical specification for a specific procurement from a person that may have a commercial interest in the procurement.
6. For greater certainty, a Party, including its procuring entities, may, in accordance with this Article, prepare, adopt, or apply technical specifications to promote the conservation of natural resources or protect the environment.
7. For greater certainty, this Chapter is not intended to preclude a Party, including its procuring entities, from preparing, adopting or applying technical specifications required to protect sensitive government information, including specifications that may affect or limit the storage, hosting or processing of such information outside the territory of the Party.

ARTICLE 86

*Modifications of tender documentation and technical specifications*

Where, a procuring entity modifies the criteria or requirements set out in a notice or tender documentation provided to participating suppliers, or amends or reissues a notice or

tender documentation, it shall transmit in writing all modifications, amended or re-issued notice or tender documentation:

- (a) to all suppliers that are participating at the time of the modification, amendment or re-issuance, if known, and in all other cases, in the same manner as the original information was made available; and
- (b) in adequate time and considering the nature and complexity of procurement to allow such suppliers to modify and re-submit amended tenders, as appropriate.

#### ARTICLE 87

##### *Time periods*

A procuring entity shall, consistent with its own reasonable needs, provide suppliers sufficient time to prepare and submit requests for participation and responsive tenders, taking into account in particular the nature and complexity of the procurement. Each Party shall apply time periods as specified in Appendix 9 to Annex XIII (Government Procurement). Such time periods, including any extension of the time-periods, shall be the same for all interested or participating suppliers.

#### ARTICLE 88

##### *Limited tendering*

1. Provided that it does not use this provision for the purpose of avoiding competition among suppliers or in a manner that discriminates against suppliers of another Party or protects domestic suppliers, a procuring entity may use limited tendering and choose not to apply Articles 80 (Notices), 81 (Conditions for participation), 82 (Registration systems and qualification procedures), 83 (Multi-use lists), 84 (Tender documentation), 87 (Time periods), 89 (Electronic auctions), 90 (Negotiations), 91 (Treatment of tenders) and 92 (Awarding of contracts) only under the following circumstances:

- (a) provided that the requirements of the tender documentation are not substantially modified:
  - (i) no tenders were submitted or no supplier requested participation;
  - (ii) no tenders that conform to the essential requirements of the tender documentation were submitted;
  - (iii) no suppliers satisfied the conditions for participation; or
  - (iv) the tenders submitted have been collusive according to the Parties' domestic laws and regulations;
- (b) where the goods or services can be supplied only by a particular supplier and no reasonable alternative or substitute goods or services exist for any of the

following reasons:

- (i) the requirement is for a work of art;
  - (ii) the protection of patents, copyrights or other exclusive rights; or
  - (iii) due to an absence of competition for technical reasons;
- (c) for additional deliveries by the original supplier of goods and services that were not included in the initial procurement where a change of supplier for such additional goods and services:
- (i) cannot be made for economic or technical reasons such as requirements of interchangeability or interoperability with existing equipment, software, services or installations procured under the initial procurement; and
  - (ii) would cause significant inconvenience or substantial duplication of costs to the procuring entity;
- (d) insofar as strictly necessary where, for reasons of extreme urgency brought about by events unforeseeable by the procuring entity, the goods or services could not be obtained in time using an open or selective tendering procedure;
- (e) insofar as is strictly necessary where, for reasons of extreme urgency brought about by events unforeseeable by the procuring entity, such as emergency and catastrophe provided for in a Party's domestic laws and regulations, the goods or services could not be obtained in time using an open or selective tendering procedure. For the purposes of this paragraph, lack of planning of a procuring entity in relation with the available funds within a specific period of time shall not constitute an unforeseeable event;
- (f) for goods purchased on a commodity market;
- (g) where a procuring entity procures a prototype or a first good or service that is developed at its request in the course of, and for, a particular contract for research, experiment, study or original development<sup>1</sup>;
- (h) for purchases made under exceptionally advantageous conditions that only arise in the very short term in the case of unusual disposals such as those arising from liquidation, receivership or bankruptcy, but not for routine purchases from regular suppliers; or
- (i) where a contract is awarded to a winner of a design contest provided that:

---

<sup>1</sup> Original development of a first good or service may include limited production or supply in order to incorporate the results of field testing and to demonstrate that the good or service is suitable for production or supply in quantity to acceptable quality standards, but does not include quantity production or supply to establish commercial viability or to recover research and development costs.

- (i) the contest has been organised in a manner that is consistent with this Chapter, in particular with respect to the publication of a notice of intended procurement; and
- (ii) the participants are judged by an independent jury with a view to a design contract being awarded to a winner.

2. A procuring entity shall prepare a report in writing on each contract awarded under paragraph 1. The report shall include the name of the procuring entity, the value and kind of goods or services procured, and a statement indicating the circumstances and conditions described in paragraph 1 that justified the use of limited tendering.

#### ARTICLE 89

##### *Electronic auctions*

1. Where a procuring entity intends to conduct a covered procurement using an electronic auction, it shall provide each participant, before commencing the electronic auction, with:

- (a) the automatic evaluation method, including the mathematical formula, that is based on the evaluation criteria set out in the tender documentation and that will be used in the automatic ranking or re-ranking during the auction;

- (c) any other relevant information relating to the conduct of the auction.

2. A procuring entity shall:

- (a) ensure that any elimination of suppliers participating in negotiations is carried out in accordance with the evaluation criteria set out in the notice or tender documentation; and

- (b) where negotiations are concluded, provide a common deadline for the remaining participating suppliers to submit any new or revised tenders.

#### ARTICLE 91

##### *Treatment of tenders*

1. A procuring entity shall receive, open and treat all tenders under procedures that guarantee the fairness and impartiality of the procurement process and the confidentiality of tenders.
2. A procuring entity shall not penalise any supplier whose tender is received after the time specified for receiving tenders if the delay is due solely to mishandling on the part of the procuring entity.
3. Where a procuring entity provides suppliers with an opportunity to correct unintentional errors of form between the opening of tenders and the awarding of the contract, the entity shall provide the same opportunity to all participating suppliers.

#### ARTICLE 92

##### *Awarding of contracts*

1. To be considered for award, a tender shall be submitted in writing and shall, at the time of opening, comply with the essential requirements set out in the notices and tender documentation and be from a supplier that satisfies the conditions for participation.
2. Unless a procuring entity determines that it is not in the public interest to award a contract, the entity shall award the contract to the supplier that it has determined to be capable of fulfilling the terms of the contract and that, based solely on the evaluation criteria specified in the notices and tender documentation, has submitted:
  - (a) the most advantageous tender; or
  - (a) where price is the sole criterion, the lowest price.
3. Where a procuring entity receives a tender with a price that is abnormally lower than the prices in other tenders submitted, it may verify with the supplier that it satisfies the conditions for participation and is capable of fulfilling the terms of the contract.
4. A procuring entity shall not use option clauses, cancel a procurement or modify awarded contracts in a manner that circumvents the obligations of this Chapter.

ARTICLE 93

***Transparency of procurement information***

1. A procuring entity shall promptly inform participating suppliers of its contract award decisions and, upon request of a supplier, shall do so in writing. Subject to Article 94 (Disclosure of information), a procuring entity shall, upon request, provide an unsuccessful supplier with an explanation of the reasons why it did not select its tender and the relative advantages of the successful supplier's tender.

2. Promptly and, in any event, no later than 30 days after the award of each contract, a procuring entity shall publish in a paper or electronic medium listed in Appendix 8 to Annex XIII (Government Procurement), a notice that includes at least the following information about the contract:

4. Each procuring entity shall, for a period of at least three years from the date of the award of a contract, maintain the documentation and reports of tendering procedures and contract awards relating to covered procurement, including the reports provided for in Article 88 (Limited Tendering), and the data that ensures the appropriate traceability of the conduct of covered procurement by electronic means.

ARTICLE 94

***Disclosure of information***

1. Upon request of another Party, a Party shall provide promptly any information necessary to determine whether a procurement was conducted fairly, impartially and in accordance with this Chapter, including information on the characteristics and relative advantages of the successful tender.

2. In cases where the release of such information would prejudice competition in future tenders, the Party that receives the information shall not disclose it to any supplier without the explicit consent of, the Party that provided the information.
3. Notwithstanding any other provision of this Chapter, no Party, including its procuring entities, shall provide information to a particular supplier that might prejudice fair competition between suppliers.

  - (d) would otherwise be contrary to the public interest.

#### ARTICLE 95

##### *Domestic review procedures for supplier challenges*

1. Each Party shall provide a timely, effective, transparent and non-discriminatory administrative or judicial review procedure, in accordance with the principle of due process, through which a supplier may challenge:

  - (b) where a supplier does not have the right to challenge directly a breach of this Chapter under the Party's domestic laws and regulation a failure to comply with a Party's measures implementing this Chapter,arising in the context of a covered procurement, in which the supplier has, or has had, an interest.
2. The procedural rules for all challenges shall be in writing and made generally available.

4. Each supplier shall be allowed a sufficient period of time to prepare and submit a challenge, which in no case shall be less than ten days from the time when the basis of the challenge became known or reasonably should have become known to the supplier.

5. Each Party shall establish or designate at least one impartial administrative or judicial authority that is independent of its procuring entities to receive and review a challenge by a supplier arising in the context of a covered procurement.

6. Where a body other than an authority referred to in paragraph 5 initially reviews a challenge, each Party shall ensure that the supplier may appeal the initial decision to an impartial administrative or judicial authority that is independent of the procuring entity whose procurement is the subject of the challenge.

7. Each Party shall ensure that a review body that is not a court shall either have its decisions subject to judicial review or have procedures that provide that:

8. Each Party shall adopt or maintain procedures that provide for:

- (a) rapid interim measures to preserve the supplier’s opportunity to participate in the procurement. Such interim measures may result in the suspension of the procurement process. The procedures may provide that overriding adverse consequences for the interests concerned, including the public interest, may be taken into account when deciding whether such measures should be applied. Just cause for not acting shall be provided in writing; and
- (b) where a review body has determined that there has been a breach of this Chapter or a failure as referred to in paragraph 1, corrective action that may include compensation for the loss or damages suffered. 3. A Party need not provide compensatory adjustments where the Parties agree that the proposed modification covers a procuring entity over which a Party has effectively eliminated its control or influence. If a Party objects to the assertion that such government control or influence has been effectively eliminated, the objecting Party may request further information or consultations with a view to clarifying the nature of any government control or influence and reaching an agreement on the procuring entity's continued coverage under this Chapter.

APPENDIX 9 TO ANNEX VIII (GOVERNMENT PROCUREMENT)

TIME PERIODS

*General Minimum Time Limit*

1. A procuring entity that uses selective tendering shall establish that the final date for the submission of requests for participation shall not, in principle, be less than 25 days from the date of publication of the notice of intended procurement. Where a state of urgency duly substantiated by the procuring entity renders this time-period impractical, the time-period may be reduced to not less than ten days.

2. Except as provided for in paragraphs 3 and 4, a procuring entity shall establish that the final date for submission of tenders shall not be less than 40 days from the date on which

- (a) in case of open tendering, the notice of intended procurement is published; or
- (b) in the case of selective tendering, the procuring entity notifies suppliers that they will be invited to submit tenders whether or not it uses a multi-use list.

*Possibilities for Reducing the General Time Limits*

3. A procuring entity may reduce the time-period for tendering established in accordance with paragraph 2 by five days for each one of the following circumstances:

- (a) the notice of intended procurement is published by electronic means;
- (b) all the tender documentation is made available by electronic means from the date of the publication of the notice of intended procurement; and
- (c) the procuring entity accepts tenders by electronic means.

4. Under the following circumstances, procuring entities may establish a time period for tendering that is shorter than the periods referred to in paragraph 2, provided that such time period is sufficiently long to enable suppliers to prepare and submit responsive tenders and is in no case less than ten days prior to the final date for the submission of tenders:

- (a) where a notice of planned procurement has been published at least 40 days and not more than 12 months in advance of the publication of the notice of intended procurement, and the notice of planned procurement contains:
  - (i) a description of the procurement;
  - (ii) the approximate final dates for the submission of tenders or requests for participation;
  - (iii) if applicable, a statement that interested suppliers should express their interest in the procurement to the procuring entity;

- (iv) the address from which documents relating to the procurement may be obtained; and
  - (v) as much of the information that is required for the notice of intended procurement under Article 80 (Notices), paragraph 3, as is available;
- (b) where the procuring entity, for recurring contracts, indicates in an initial notice of intended procurement that subsequent notices will provide time limits for tendering based on this paragraph;
- (c) where a procuring entity purchases commercial goods or services, or any combination thereof, it may reduce the time-period for tendering established in accordance with paragraph 2 to not less than 13 days, provided that it publishes by electronic means, at the same time, both the notice of intended procurement and the tender documentation.
